STATEMENT OF THE DIRECTRESS

LOOKING INTO THE FUTURE

CICS.NOVA was founded in 2015 with an ambitious mission – to develop high-quality, innovative interdisciplinary research that fosters critical thinking in the Social Sciences and policymaking. Being based at the School of Social Sciences and Humanities (FCSH) of Universidade NOVA de Lisboa, with four regional poles at other higher education institutions, seemed a major plus from the very beginning. In March 2020, I became Directress of CICS.NOVA with a wonderful team by my side: six Research Groups coordinators, with whom I have been sharing my experience in the Direction of CICS.NOVA and with whom I have learned. Allow me also a special word to the regional poles coordinators that actively participate with a critical reflection on the complex problems with which the centre has been faced during the current biennium.

We had a common goal – to transform CICS.NOVA into a social sciences research institution recognized worldwide for embracing creativity and fostering freedom to chase interdisciplinary research in social sciences, to promote critical thinking and disseminate the acquired knowledge in the concerned communities, both on the national and international level, namely through the action of its regional poles. Our vision was, and continues

to be, to attract the most curious minds with ambitious research portfolios but, above all, to maximize every available resource, to boost creativity and productive action towards the future. As such, we implemented several changes in research support services, and we are proud to say that, even though this has been a hard journey, the results began to emerge and follow a successful path. Most of this success must be credited to the entire Science and Technology Management team for their professionalism, dedication and, above all, resilience in a complex context of difficult articulation between the different research groups and regional poles. The way that this team has been coordinated, helped to demonstrate that an excellent science administration must be a treasured component of high-quality research. It is with the feeling of starting to accomplish our role as an executive team at CICS.NOVA that we entered 2022.

But let me tell you a little about the journey of these last two years. In early 2020, we began as a new team. By then, “looking into the future” was the expression stuck in our minds to continue pursuing our goals. However, 2020 turned out to be quite different from what we expected. With the COVID-19 pandemic expanding globally, major restrictions on daily life have been implemented to prevent the spread of infection. The pandemic transformed the way we worked, from campus shutdowns, meetings postponed and/or moving to the virtual world. Social problems and disparities increased, and we realized the importance and urgency of a social sciences' perspective on COVID-19 times. Social scientists of CICS.NOVA, as well as researchers from other institutions around the world, have been demonstrating that this is not just a health crisis. This crisis is also social and political and must be seen as a moment of rupture that will entail profound changes in our societies on a global scale.

Having said that, the past two years were times of accelerated changes, challenges, and opportunities for us all. Despite all obstacles, we managed to make 2020 and 2021 more than just the years of the COVID-19. Those were also the years of achievements, as well as adapting and rethinking on how we want to do science. These were good years for scientific recognition and successes, as well as adapting. As the 2020 report shows, although CICS.NOVA had to adapt to the pandemic restrictions, much has been done, not only concerning research activities but also regarding internal participation and the regular activities of governance and decision-making.

In 2020, there was a general increase in achievement indicators, namely in the number of articles published in high-impact journals (SCOPUS, WoS, Scielo, PubMed) and in

international journals in general. There was a pronounced internationalization of the outputs produced, including participation in international proceedings, that reflected greater participation in international scientific events resulting in publications that meet the peer review criteria. CICS.NOVA also submitted a higher number of research proposals, with a rate of success consistently above average. Advanced training activities and initiatives, in the framework of the graduate, Master's and PhD, but also in other formats, were carried on.

If there is a lesson to be taken from this pandemic, it is that innovation can certainly be inspired by accelerated changes and challenges. An impressive number of seminars and initiatives, mostly online, were organized, giving public expression to CICS.NOVA research and dissemination activities. We are now actively present at the main social networks (Facebook, Instagram, Twitter, and YouTube), giving real expression to CICS.NOVA research and activities and valuing them scientifically and socially, as poles of science/society interaction and/or knowledge transfer.

Looking into the future, whatever it brings us, we will keep working hard, committed to our mission. The success key to all of this has been the high-level of participation and commitment of CICS.NOVA researchers. Your contribution has been invaluable, and it has been very rewarding to realize that we can all count on each other. As scientists and citizens, we all should reflect on the lessons learned from these past two years of transformation in our lives and on which future we wish to build for science and society.

Helena M R Serra

ORGANISATION

MISSION

CICS.NOVA's mission is to conduct interdisciplinary research in social sciences, to promote critical thinking and disseminate the acquired knowledge in the concerned communities, both on the national and international level. CICS.NOVA assigns a particularly relevant role to teaching and advanced training, through the coordination and participation in several Doctoral programs, Master's and open courses, and by welcoming researchers in academic training. An equally important contribution is the co-creation and knowledge transfer alongside policymakers, companies, and other civil society organisations, particularly through the activities developed by the Observatories and Laboratories. CICS.NOVA also fosters the dissemination and communication of science and knowledge through a strong presence in the scientific community and in the public space. These priorities are guided by the interdisciplinary study of territorial systems and human behaviour, the particularities of the institutions' functioning and their relations with the surrounding spatial and social contexts.

Concerning Publications – Papers in 2020, the RG1 published 3 papers in indexed scientific journals, one in a Scopus and WOS indexed journal; 6 papers in international scientific journals and 6 papers in national scientific journals. Regarding book publications, book chapters in national publisher with no peer review was the most expressive item, followed by book chapters in national publisher (4 publications), and book chapters in international publisher (2 publications).

The 2020 was the peak of the pandemic, and the initiatives and events developed within this research group were particularly affected. Hence there was only one event organised within the RG1.

A particular important indicator for the CICS.NOVA's activity and vitality regarding the Advanced Training were the 12 Master's theses and one PhD theses completed.

In 2020, our group had one R&D Project FCT selected, as part of a special COVID call (FCT GENDER RESEARCH 4 COVID 19), as well as two other funded projects 2, with European funding EEA-Grants.

In 2020, RG2 researchers' continued to be involved in competitive national- and European-funded research projects, focusing, for instance, on how platform-work impacts on workers' forms of representation and organisation, on the role of culture and art in political expression and participation in the public sphere, and on how high-risk social groups, such as children, youth and detainees, access and exercise their citizenship rights.

Our work resulted in 16 indexed papers (12 in Scopus/Web of science); 5 books; 20 book chapters and the coordination of 8 issues in scientific journals. In addition, 1 PhD was successfully completed, as well as 43 Master's theses.

In the last years, our group has been successful in several competitive R&D funding calls for individual and team projects and as a result, in 2020, the group has one Marie Curie fellowship, one Jean Monnet Chair and projects funded within Erasmus+, Creative Europe, H2020 and FCT among other programs. Additionally, RG3 runs several projects commissioned by civil society institutions. Many projects include policy recommendations and/or the co-creation of knowledge.

Our work resulted in a relevant number of publications, including 22 scientific articles indexed in Scopus and Web Of Science in a total of 42; 28 book chapters, 8 of them indexed; 7 organized books, 2 indexed and 7 journal issues, 3 in indexed journals. 6 PhD students and 26 Master's students defended their thesis under the supervision of our researchers.

Our group activities have included several meetings, Autumn Seminar and the preparation of Student workshops to be held in 2021.

SUBJECTIVE WELL-BEING OF CHILDREN IN CARE: COMPARISON BETWEEN PORTUGAL AND CATALONIA

Child and Adolescent Social Work Journal

João Carvalho et al. | RG 2

The subjective well-being (SWB) of children in out-of-home care is crucial to assess their potential quality of life. This study compares SWB of children in residential care and in foster families in Portugal and Catalonia. Results indicate that children in residential care have a lower SWB compared to children in the foster care groups, in both territories. These results should challenge public policymaking for children to change from an attitude dominantly in favor of institutionalisation to a more successful approach based on family foster care. This provides the opportunity for children in out-of-home care to grow up with higher SWB and a better life trajectory.

Abstract

The subjective well-being (SWB) of children in out-of-home care is crucial to assess their potential quality of life today and in the future. This study aims at comparing SWB of children in residential care and in foster families in two European territories or jurisdictions: Portugal and Catalonia (Spain). This study used a sample of 551 children, aged between 11 and 15, being 39 in foster care and 145 in residential care in Portugal, and 41 and 326 respectively in Catalonia. SWB was measured with the Personal Well-being Index-School Children (PWI-SC9) and other variables were evaluated, such as happiness with the placement, relationship with carers, satisfaction with school, and perceptions about themselves and their lives. Results indicate that children in residential care have a lower SWB, as well as lower scores in most of the other variables, compared to children in the foster care groups in the two territories. These results should challenge public policymaking for children to change from an attitude dominantly favourable to institutionalisation to a more successful approach based on family foster care. This can provide the opportunity for children in out-of-home care to grow up with higher SWB and, probably, a better life trajectory.

SHAPING ENERGY TRANSITION AT MUNICIPAL SCALE: A NET-ZERO ENERGY SCENARIO-BASED APPROACH

Land Use Policy

Francesca Poggi, Ana Firmino et al. | RG 3

Policymaking and planning need to promote energy transition, linking its spatial dimensions to the sustainable development of territories. However, the implications of this process for urban and rural regions are uncertain and complex, increasing pressure on local actors. This study focusses on the municipal scale, developing a Net-Zero Energy scenario-based approach to strengthening the integration of renewable energy production and energy efficiency into the formulation of policies and spatial planning. Results reveal how shaping energy transition depends on the understanding of both the spatial and functional dimensions of urban and rural land-use which should be the core focus to developing incremental and adaptive place-based policies toward net-zero energy municipalities.

ABSTRACT

In recent years, it has become apparent that both policymaking and planning need to promote energy transition, linking its spatial dimensions to the sustainable development of territories. However, the interactions and implications of this process for urban and rural regions are uncertain, dynamic and complex, increasing pressure on local actors. This study focuses on the municipal scale, developing a Net-Zero Energy scenario-based approach to strengthening the integration of renewable energy production and energy efficiency into the formulation of policies and spatial planning. Here, the concept of energy balance is adopted to plan the municipality as a self-reliant system able to anticipate and adapt to future transformations and changes associated with energy transition. Using as a case study a Portuguese municipality with 73 % of land occupied by rural areas and about 27 % by urbanised areas, the method qualifies and quantifies the spatial relationships associated with the energy balance, combining energy statistics with Land Use dataset and vectorial layers, in a GIS environment. Results reveal how shaping energy transition depends on the understanding of both the spatial and functional dimensions of urban and rural land-use, which should be the core focus to developing incremental and adaptive place-based policies toward net-zero energy municipalities.

MODELING NATURE-BASED AND CULTURAL RECREATION PREFERENCES IN MEDITERRANEAN REGIONS AS OPPORTUNITIES FOR SMART TOURISM AND DIVERSIFICATION

Sustainability

André Samora-Arvela et al. | RG4

The tourism and recreational offer of Mediterranean destinations involves, essentially, the promotion of mass tourism, based on the appeal of the sun and beach, and the quality of its coastal assets. Alongside the impacts of climate change, poor tourism diversification is a threat to the resilience of the territory. Thus, noncoastal tourism products present an opportunity to strengthen regional resilience. A study, conducted among beach tourists and residents of three municipalities of Algarve (Portugal), shows a significant preference for noncoastal outdoor recreational activities. Respecting the existing recreational structure and constraints, a suitability map for territory enhancement and the implementation of smart tourism practices for each tourism activity and landscape unit is presented.

Abstract: The tourism and recreational offer of Mediterranean destinations involves, essentially, the promotion of mass tourism, based on the appeal of the sun and beach, and the quality of its coastal assets. Alongside the impacts of climate change, poor tourism diversification represents a threat to the resilience of the territory. Thus, heterogenization of noncoastal tourism products presents an opportunity to strengthen regional resilience to present and future challenges, hence the need to study, comparatively, the complementary preferences of tourists and residents of these regions in order to unveil their willingness to diversify their recreational experience, not only in coastal spaces, but also—and especially—in interior territories with low urban density. Consequently, this strategic option may represent a way of strengthening resilience and sustainability through diversification. In this context, a survey was conducted among 400 beach tourists and 400 residents

IS THE SEGMENTED SKILL DIVIDE PERSPECTIVE USEFUL IN MIGRATION STUDIES? EVIDENCE FROM THE PORTUGUESE CASE

Journal of International Migration and Integration

José Carlos Marques et al. | RG 5

Boundaries among social scientists continuously challenge the scope for obtaining broader reaching views. This constitutes the case for migration studies, generally perceived as interdisciplinary, gathering contributions from social scientists with diverse disciplinary background. This paper discusses the relevance of the division between high and less skilled emigration, trying to understand which aspects place them in the same framework and which facets separate them out into isolated categories. The study puts forward evidence about sociodemographic profiles, migration strategies, and the integration processes of high and less skilled emigrants moving in the same context, by comparing both groups in Portugal at the beginning of the new millennium.

Is the Segmented Skill Divide Perspective Useful in Migration Studies? Evidence from the Portuguese Case

José Carlos Marques¹ • Pedro Candeias² • Pedro Góis³ • João Peixoto⁴

Published online: 02 March 2020
© Springer Nature B.V. 2020

Abstract

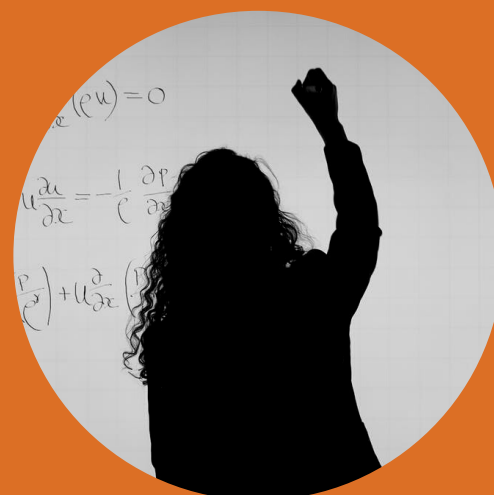

Boundaries among social scientists continuously challenge the scope for obtaining broader reaching views. This constitutes the case for migration studies, generally perceived as interdisciplinary and correspondingly gathering contributions from many social scientists with diverse disciplinary background. For example, many practical and institutional boundaries separate those studying so-called voluntary and forced migration. The same sub-disciplinary division also applies to the study of highly skilled migration. Even when treated as part of overall migration, highly skilled migrants are viewed as so specific that their study must not be mixed in with other migrants. The main aim of this paper

USING TASKS TO DEVELOP PRE-SERVICE TEACHERS' KNOWLEDGE FOR TEACHING MATHEMATICS WITH DIGITAL TECHNOLOGY

ZDM Mathematics Education

Helena Rocha | RG 6

Teacher education is central to the development of the professional knowledge of pre-service teachers. This paper reflects on the development that the analysis of a set of tasks, based on elements related to domains of KTMT—Knowledge for Teaching Mathematics with Technology—can bring to the knowledge of pre-service teachers of mathematics. The results suggest that influences in the pre-service teachers' discussion of tasks fell into the following categories: the potentialities of technology, the type of tasks, the prospective teachers' experience with a set of tasks, and analysis of some real students' reports. Regarding KTMT, Teaching and Learning and Technology Knowledge was the domain in which stronger development took place.

Abstract

Teacher education is central to the development of the professional knowledge of pre-service teachers. The main goal of this paper is to reflect on the development that the analysis (done by a group of pre-service secondary teachers) of a set of tasks, based on elements related to domains of KTMT—*Knowledge for Teaching Mathematics with Technology*—can bring to the knowledge of pre-service teachers of mathematics. Specifically, the goal was to investigate the following questions: (1) What are the factors that guide the pre-service teachers' task discussion? (2) Which KTMT domains are emphasized by pre-service teachers during task discussion? The elements taken into account are the characteristics of the tasks (focus on cognitive level, structuring level and technology role), the use of representations (focus on balance and articulation of representations), and the equilibrium between experimentation (focus on digital technology affordances) and justification (focus on argumentation and proof). The methodology of this case study involves a qualitative approach. The main conclusions suggest that influences in the pre-service teachers' discussion of tasks fell into the following categories: the potentialities of technology, the type of tasks, and the prospective teachers' experience with a set of tasks, and analysis of some real students' reports. With regard to KTMT, although it was possible to identify some global development, *Teaching and Learning and Technology Knowledge* was the domain in which stronger development took place.

OBSERVATORY ON VIOLENCE AND GENDER | ONVG

Coordinator Manuel Lisboa

PROJECTS FINANCED IN 2020

O impacto da COVID-19 na violência contra as mulheres: uma análise longitudinal

Funding entity: FCT

Call: GenderResearch for Covid-19 FCT

Starting Date: 2020

Ending Date: 2021

Coordinator: Manuel Lisboa

CICS.NOVA Team: Manuel Lisboa, Dalila Cerejo, Ana Lúcia Teixeira, Ana Paula Gil, Maria João Leote de Carvalho

Lisboa + Igualdade. Atendimento e Prevenção da Violência Doméstica

Funding entity: Câmara Municipal de Lisboa

Starting Date: 2020

Coordinator: Manuel Lisboa

CICS.NOVA Team: Manuel Lisboa, Ana Lúcia Teixeira, Dalila Cerejo, Elisabete Brasil

Lisboa + Igualdade. Atendimento e Prevenção da Violência Doméstica – 2nd Phase

Funding entity: Câmara Municipal de Lisboa

Starting Date: 2020

Ending Date: 2021

Coordinator: Manuel Lisboa

CICS.NOVA Team: Manuel Lisboa, Ana Lúcia Teixeira, Dalila Cerejo, Elisabete Brasil

RUNNING PROJECTS

2º Inquérito à Violência de Género – Região Autónoma dos Açores

Funding entity: Secretaria Regional da Solidariedade Social – Governo Regional dos Açores

Starting Date: 2019

Ending Date: 2020

Coordinator: Manuel Lisboa

CICS.NOVA Team: Manuel Lisboa, Dalila Cerejo, Ana Lúcia Teixeira, Rafaela Neves, Gilberta Rocha, Piedade Lalanda, Suzana Caldeira, Daniela Soares

RUNNING PROJECTS | PARTNER ENTITY

MAIs – Mulheres Agricultoras em Territórios do Interior

Funding entity: EEA Grants

Hosting Institution: Instituto Politécnico de Viseu

Starting Date: 2020

Ending Date: 2022

Coordinator: Cristina Amaro da Costa

NOVA FCSH Coordinator: Manuel Lisboa

CICS.NOVA Team: Rosário Rosa, Miguel Jesus

ViViDo – Plataforma de Gestão da Rede Nacional de Apoio a Vítimas de Violência Doméstica

Funding entity: EEA Grants

Hosting Institution: Universidade de Lisboa - IGOT

Starting Date: 2020

Ending Date: 2022

Coordinator: Margarida Queirós

NOVA FCSH Coordinator: Manuel Lisboa

CICS.NOVA Team: Ana Lúcia Teixeira, Dalila Cerejo, Ana Ribeiro da Silva

Percurso de saúde da criança imigrante: um estudo de coorte para o Concelho da Amadora

Funding entity: Fundo Asilo, Migração e Integração (FAMI), no Quadro Financeiro Plurianual para o período 2014 – 2020 da União Europeia

Hosting Institution: Universidade NOVA de Lisboa - IHMT

Starting Date: 2018

Ending Date: 2020

Coordinator: Maria do Rosário Oliveira Martins

CICS.NOVA Team: Manuel Lisboa, Ana Lúcia Teixeira

Violência doméstica contra a mulher: justiça integral e monitoramento da efetividade do FRIDA (Formulário Nacional de Risco e Proteção à Vida)

Funding entity: União Europeia – Programa Diálogos EU-Brasil

Hosting Institution: CNMP – Conselho Nacional do Ministério Público

Starting Date: 2019

Ending Date: 2020

Coordinator: Maurício Rodrigues - CNMP

CICS.NOVA Team: Manuel Lisboa, Ana Lúcia Teixeira

INTERNATIONAL NETWORKS

European network on violence and gender

ISA - International Sociological Association, and RC51 - Research Committee on Sociocybernetics

NATIONAL NETWORKS

VALE FORMOSO'S SOIL EROSION EXPERIMENTAL CENTRE | CEESVF

Coordinator Maria José Roxo

RUNNING PROJECTS

LIFE 2016 Project DESERT-ADAPT: Preparing desertification areas for increased climate change

Funding entity: H2020 European Commission

Hosting Institution: Università degli Studi della Campania Luigi Vanvitelli

Starting Date: 2017

Ending Date: 2023

NOVA FCSH Coordinator: Maria José Roxo

CICS.NOVA Team: Pedro Casimiro

NATIONAL NETWORKS

Comissão Nacional de Combate à Desertificação e CCDesert

VISITING RESEARCHERS

Professor Adolfo Calvo-Cases - Universidad de valência

OBSERVATORY OF TECHNOLOGY ASSESSMENT | OAT

Coordinator António Brandão Moniz

PROJECTS FINANCED IN 2020

InteliArt "Artificial Intelligence: Effects on work and employment in Portugal"

Funding entity: Santander / NOVA

Call: Santander/NOVA Collaborative Research Award 2019-2020

Starting Date: 2021

Ending Date: 2023

Coordinator: Nuno Boavida

RUNNING PROJECTS

Stress-induced neuroinflammation: mechanisms and implications for decision-making and performance

Funding entity: Santander / NOVA

Starting Date: 2018

Ending Date: 2021

NOVA FCSH Coordinator: Ana Ferreira

Crowdwork (DG EMP VP/2018/004) - Finding new strategies to organise in Europe

Funding entity: European Commission, DG Employment, Social Affairs and Inclusion

Project Leader: Universidade NOVA de Lisboa

Starting Date: 2019

Ending Date: 2021

NOVA FCSH Coordinator: Nuno Boavida

CICS.NOVA Team: António Brandão Moniz

RUNNING PROJECTS - PARTNER ENTITY

INVOLVE (DG EMP) VP/2019/004/0015 - Involving social partners in dual VET governance: exploring the contribution of social partners in the design, renewal and implementation of dual VET

Funding entity: European Commission, DG Employment, Social Affairs and Inclusion

Project Leader: NOTUS (ES)

Starting Date: 2020

Ending Date: 2021

NOVA FCSH Coordinator: Nuno Boavida

CICS.NOVA Team: António Brandão Moniz

Work-life Balance collective bargaining (VP/2019/004/0009) - Role of collective bargaining in shaping work-life balance in public service sector – challenges and perspectives

Funding entity: European Commission, DG Employment, Social Affairs and Inclusion

Project Leader: CSIT Union Profesional - Spain

Starting Date: 2020

Ending Date: 2022

NOVA FCSH Coordinator: Nuno Boavida

CICS.NOVA Team: António Brandão Moniz

Metalworkers 4.0 [Metalowcy 4.0] - High competence of employees as a means for high adaptability of enterprises to technological changes (POWR.04.03.00-IP.07-00-005 / 18) PO Poland

Funding entity: European Commission, DG Employment, Social Affairs and Inclusion

Project Leader: Federacja Związków Zawodowych Metalowców i Hutników w Polsce

Starting Date: 2019

Ending Date: 2021

NOVA FCSH Coordinator: António Brandão Moniz

CICS.NOVA Team: Nuno Boavida, Bettina-Johanna Krings

Project Deep View - Exploring the contribution of social dialogue and collective bargaining in the promotion of decent and productive virtual work

Funding entity: European Commission Employment and Social Innovation (EaSI)

Project Leader: NOTUS (ES)

Starting Date: 2018

Ending Date: 2020

NOVA FCSH Coordinator: António Brandão Moniz

CICS.NOVA Team: Nuno Boavida

Caio Gonçalves

ORGANISATION OF SCIENTIFIC EVENTS

International Seminar “Avaliação de Tecnologias em Saúde”, February 14, Faro.

Lisbon’s Scientific meeting of the project INVOLVE, Project INVOLVE – Involving social partners in dual VET governance: exploring the contribution of social partners in the design, renewal and implementation of dual VET (Ref. VP/2019/004/0015), November 24, CICS.NOVA - UNL, Lisbon.

AZOREAN YOUTH OBSERVATORY

Coordinator Rolando Lalanda Gonçalves

RUNNING PROJECTS

Estudo Síntese sobre Jovens Açorianos Qualificados e Migrações

Funding entity: Direção Regional da Juventude do Governo Regional dos Açores

Starting Date: 2016

Ending Date: 2022

Coordinator: Rolando Lalanda Gonçalves

Youth Online

Funding entity: Direção Regional da Juventude do Governo Regional dos Açores

Starting Date: 2019

Ending Date: 2022

Coordinator: Rolando Lalanda Gonçalves

Formação Profissional e Juventudes – Vivências e perspetivas de jovens no mercado de trabalho sobre a formação profissional

Funding entity: Direção Regional da Juventude do Governo Regional dos Açores

Starting Date: 2019

Ending Date: 2022

Coordinator: Ana Cristina Palos

Co-coordinator: Francisco Sousa

Discursos de Ódio nas Redes Sociais: Um Olhar sobre a Juventude Açoriana

Funding entity: Direção Regional da Juventude do Governo Regional dos Açores

Starting Date: 2021

Ending Date: 2022

Coordinator: Pilar Damião de Medeiros

Co-coordinator: Daniela Soares

ORGANISATION OF SCIENTIFIC EVENTS

Webinar «Os jovens e o mundo digital», June 8, online.

INCLUSION AND ACCESSIBILITY IN ACTION RESEARCH OBSERVATORY | IACT

Coordinator Catarina Frade Mangas

RUNNING PROJECTS

Supporting educational and social inclusion of youth early leavers and youth at risk of early leaving through mechanisms of orientation and tutorial actions (Orienta4YEL)

Funding entity: “Education, Audiovisual and Culture Executive Agency – EACEA (ERASMUS +)”

Project Leader: Universitat Autònoma de Barcelona

Starting Date: 2018

Ending Date: 2022

CICS.NOVA Team: Carla Freire, Catarina Mangas

The social impact of Infection Prevention and Control on residential structure for the elderly during COVID-19 crisis

Funding entity: Observatorio Social de ‘la caixa’

Starting Date: 2020

Ending Date: 2021

CICS.NOVA Team: Catarina Mangas

VISITING RESEARCHERS

Desirée Nobre Salazar – Universidade Federal de Pelotas (UFPel)

Eva Navarro Martinez – Universidad de Valladolid

Guadalupe Martín-Mora Parra – Universidad de Extremadura

ORGANISATION OF SCIENTIFIC EVENTS

Conferência Internacional para a Inclusão (INCLUDiT VI), November 20-21, Leiria (PT).

Jornadas Comunicação Acessível, July 8, Leiria (PT).

SUPERA - Sociedade Portuguesa de Engenharia de Reabilitação, Tecnologias de Apoio e Acessibilidade

CICS.NOVA EDITIONS

CICS.NOVA is committed to Open Science, to make scientific knowledge available, accessible, and reusable to the scientific community and society in general. The promotion and implementation of Open Access in our researchers' publications, but also in our own editions, is part of that commitment.

In order to learn best practices and participate in discussions and activities, we are represented in the NOVA FCSH Open Science Working Group (GTCA), having

participated in the 2020 and 2021 International Open Access Week events.

Our Research centre publishes four open access scientific journals (*Configurações*, *Desenvolvimento e Sociedade: Revista Interdisciplinar em Ciências Sociais*, *Faces de Eva: Estudos sobre a Mulher* and *Forum Sociológico*), two book collections with Húmus Editions (*Coleção Diagnósticos & Perspectivas* and *Coleção Debater o Social*) and one e-book collection.

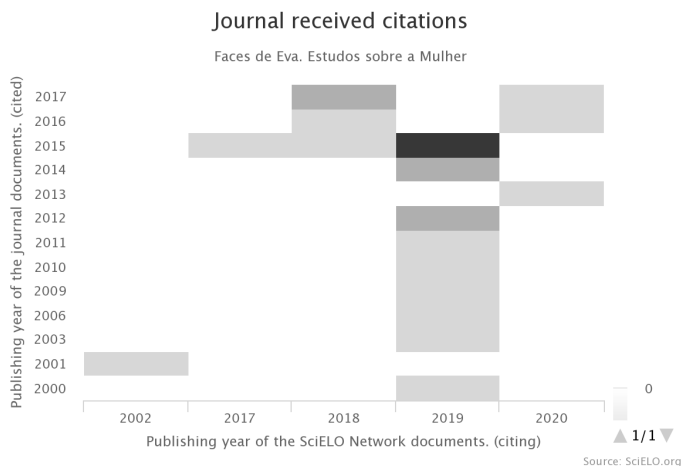

JOURNALS

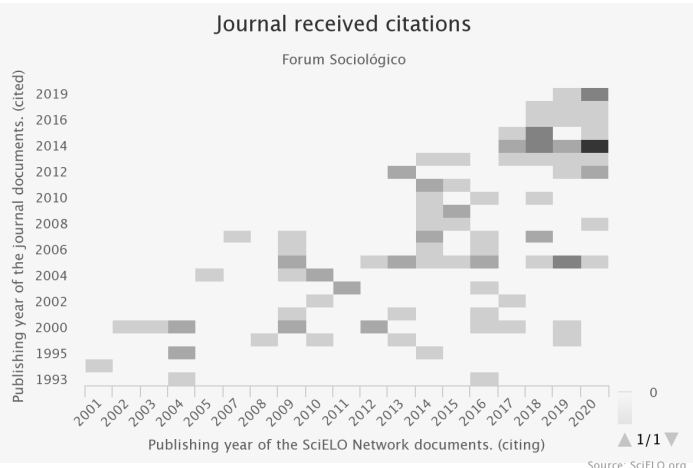

Desenvolvimento e Sociedade: Revista Interdisciplinar em Ciências Sociais is an edition of our hub at Universidade de Évora and it had one issue in 2020, focused on the COVID-19 pandemic and its societal consequences.

Configurações, a publication of our hub at Universidade do Minho, is present in the Open Edition Journals platform. In 2020, the journal had 2 thematic issues (Economy and Society: Politics, practices, agents, and institutions and Debater o desenvolvimento: Questões, dilemas e alternativas)

Faces de Eva. Estudos sobre a Mulher is present in the SciELO/Portugal platform since 2016 and is working on submissions for Open Edition Journals, DOAJ and Scopus. The journal edited two issues in 2020.

In 2020, **Forum Sociológico** was already present in the Open Edition Journals platform and its editorial board worked on a submission for SciELO/Portugal indexing platform, by improving and clarifying publication practices, which finally was successful in 2021. The journal had one thematic issue (Viver a mobilidade: Percursos, permanências e registos) and one non-thematic issue in 2020.

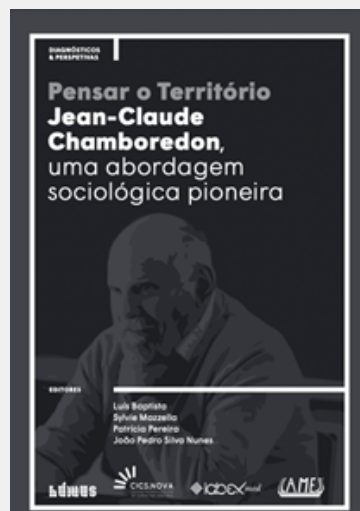

In 2020, CICS.NOVA adopted Creative Commons Licences and ORCID author identifications for most Journals under its responsibility, to promote transparency and eliminate ambiguity in authorship and copyright.

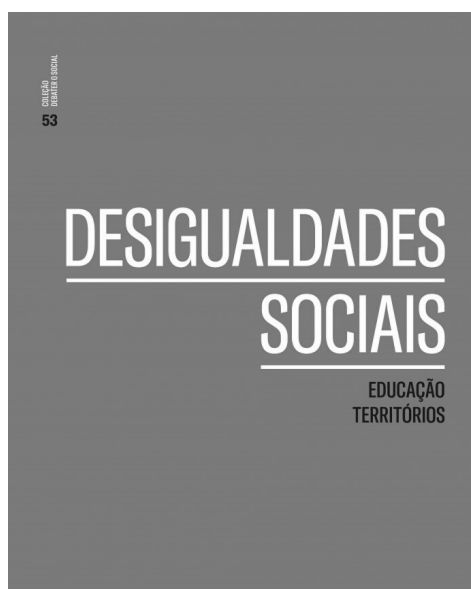

BOOK COLLECTIONS

The *Coleção Diagnósticos & Perspectivas* (CICS.NOVA/Húmus) is an open access book collection, mainly without publication fees for authors. All books within the collection are peer reviewed, are attributed a CC BY Licence, DOI and ISBN and are available for readers on CICS.NOVA's website and on the NOVA Research Portal. In 2020, the collection published two volumes: *A política social nos fascismos: A Europa nas trevas*, authored by Jordi Estivill, and *Pensar o território: Jean-Claude Chamboredon, uma abordagem sociológica pioneira*, edited by Luís Baptista; Sylvie Mazzella; Patrícia Pereira and João Pedro Silva Nunes.

The *Debater o Social* (CICS.NOVA/Húmus) is a book collection with more than 50 volumes, edited by CICS.NOVA's branch at Universidade do Minho. In 2020, three new books were published and presented: *Açores: Retratos e tendências sociais*, organized by Gilberta Rocha and Fernando Diogo, *Desigualdades sociais: Educação*,

Territórios, coordinated by Álvaro Borralho, Ana Cristina Palos, Fernando Diogo, Gilberta Rocha and Sandro Serpa, and *Espaço urbano e habitação básica como primeiro direito*, organized by Manuel Carlos Silva, Luís Baptista, Fernando Bessa Ribeiro, Joel Felizes and Ana Maria Nogales Vasconcelos. The collection's director and editorial team are committed to systematically implementing peer review and online open access.

In 2020, CICS.NOVA's **e-book collection** published the volume *Alimentar boas práticas - Da produção ao consumo sustentável*, coordinated by Cecília Delgado, in cooperation with the National Platform Alimentar Cidades Sustentáveis. All volumes in the collection are peer reviewed and are attributed a Creative Commons License, DOI and ISBN.

SCIENCE MANAGEMENT

CICS.NOVA is supported by the collaboration of eight Science and Technology Managers, distributed by the institutional partners (Universidade NOVA de Lisboa, Universidade dos Açores, Universidade do Minho, Instituto Politécnico de Leiria, and Universidade de Évora), that generates support for scientific research.

The science management team collaborates in the administrative and financial management of the research unit; in the pre-award research administration (finding funding; budget creation; filling out proposal forms; submitting the proposal; etc.); in the post-award research administration (project managing; financial compliance monitoring; monitoring, reporting; and billing); in editions management; and in science communication activities.

TRAINING @ CICS.NOVA | FOSTERING NEW CRITICAL THINKING

Regarding running Advanced Training, CICS.NOVA has 10 Doctorate offers that provide a wide range of scientific areas. They are the following: Climate Change and Sustainable Development Policy; Development, Societies, and Territories; Geography and Territorial Planning; Human Ecology; Urban Studies; Sociology-OpenSoc; Sociology UÉvora; Sociology UMinho; Technology Assessment and Gender Studies.

The CICS.NOVA offer related to Master's is even more extensive. The 16 Master's possibilities are as follows: Anthropology; Crime, Difference, and Inequalities; Intercultural Mediation and Social Intervention; Human Ecology and Contemporary Social Problems; Migration, Inter-Ethnicity and Transnationalism; Community Policies and Territorial Cooperation; Education Studies; Social Policies and Regional Dynamics; Sociology UÉvora; Sociology UMinho; Sociology NOVA; Spatial Planning and Geographic Information Systems; Sustainable Urbanism and Territorial Management; Territorial Management; Urban Studies and Women's Studies. Women in Society and in Culture.

NEW RESEARCH FELLOWS (FCT)

In 2020 CICS.NOVA had 2 PhD Research Studentships (FCT). The new research fellows are:

Bárbara Janiques de Carvalho – Research Group 2

CICS.NOVA Supervisor: Lídia Marôpo

Project Title: A construção de identidades e sociabilidades juvenis em rede: celebrificação, cultura do consumo e género nos media sociais

Nuno André Patrício – Research Group 3

Supervisor: Jordi Nofre

Project title: A agenda urbana 'participativa' da América do Sul para o Sul de Europa: Diálogos no ressurgimento de práticas arquitetónicas e urbanas no pós-crise de 2008

WORKSHOPS

Although 2020 was strongly affected by the pandemics, CICS.NOVA managed to organized several scientific initiatives. Regarding workshops and/or events, we highlight the following:

- Online session to celebrate the National Day of the Sea and publicize the Ambassadors of the Sea Project
- Event “Visão Estratégica para o Plano de Recuperação Económica de Portugal 2020-2030”
- Event “O Liberalismo em Portugal e no Brasil: 200 anos depois da Revolução”
- Event “Covid-19: Do que estamos a falar?”
- Event "A Ética dos Indivíduos e das Organizações numa Modernidade em Crise por causa do Covid19"

CONFERENCES AND WEBMINARS

Regarding conferences and Webminars, we highlight the following:

3rd Internacional Ageing Congress 2020

International project presentation seminar «Vivido - Plataforma de Gestão da Rede Nacional de Apoio a Vítimas de Violência Doméstica»

8th Internacional Conference “Mediação Intercultural e Intervenção Social”

Conference "Academia e Cansaço: Pesquisa feminista e intensificação laboral"

VI Internacional Conference for Inclusion | INCLUDiT

1st Internacional Conference “Estudos da Noite”

Seminar online GeoSegurança Sanitária – ESTADO DE EMERGÊNCIA 2.0,

Webinar “Cuidados Paliativos: Uma Abordagem Sociológica”

Webinar "Os jovens e o futuro do emprego"

Webinar “Etnografia em serviços de saúde: passado, presente e futuro”

Webinar “Reflexões sociológicas em torno da Covid-19”

Webinar "Youth and Covid19"

INCENTIVE TO SCIENTIFIC PRODUCTION - RESEARCH FELLOWS

Although it was created in 2020, the Incentive to scientific production for research fellows was only applied in 2021.

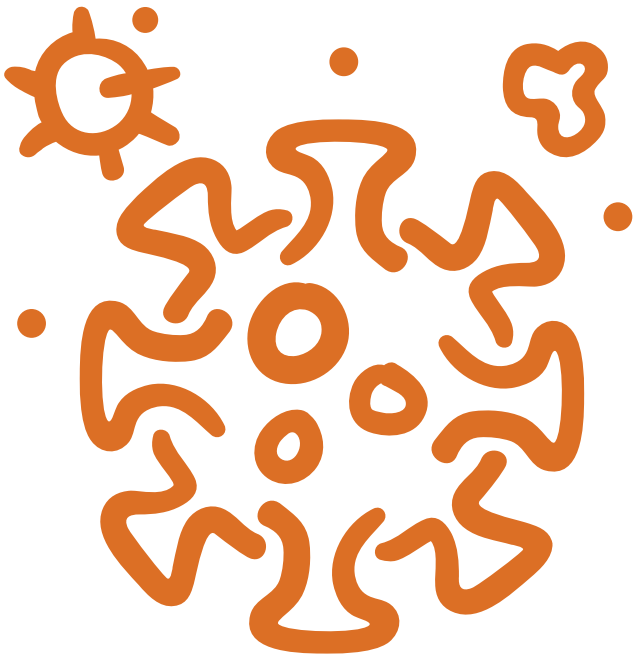

This incentive aims to support scientific activities of PhD researchers that contribute to CICS.NOVA scientific strategy and applies to proposals for activities to be developed in 2021. This incentive is open to all doctoral researchers, with a maximum value of 500 Euros/Researcher, in the following areas: Publications and Participation in scientific events, including schools or summer and winter courses. The evaluation of the proposals takes into account the adequacy of the proposal to the specific objectives set out, its articulation with the researcher's CV, its feasibility and its scientific relevance.

CICS.NOVA INITIATIVES

Every year, CICS.NOVA organizes an Openday to all Master's and Doctoral students associated with our offer. In 2020 the Openday was online and was highly participated. CICS.NOVA was also involved in the 2020 NOVA FCSH Summer School.

CICS.NOVA was also involved in the European Researchers' Night initiative.

COVID-19

The COVID-19 Pandemic, which started in December 2019 in Wuhan (China), has profoundly disrupted our societies on a global scale. Since that moment, we have been facing serious, complex, and interrelated health as well as social and economic challenges that imposed significant changes on different levels. Along the public health crisis, came a social crisis. Therefore, besides the important role of the biomedical sciences to contain the spread of the SARS-CoV-2 infection, the crucial contribution of the social sciences to better understand and deal with the multidimensional impacts (political, socioeconomic, and psychological) of the pandemic is also largely recognised.

At first, during the immediate response to the health crisis, analysing the management of the pandemic in the emergency phase and the nature and extent of the disruptions it

introduced in various domains. At a later time, with a shift in focus to a future horizon, systematizing the lessons to be learned and exploring the transforming agenda that the post-COVID-19 era can entail. This transforming agenda can be at the political, socio-cultural, economic, technological, health and environmental levels, introducing a new “normal” in the medium and long term.

On June 5, 2020, shortly after the outbreak of the COVID-19 pandemic, the board of CICS.NOVA decided to create a digital platform to function as a repository of content related to what is being produced by its researchers around this issue. The digital platform – **Social Sciences Lab** – has been acting as an integral part of the science communication and dissemination efforts of CICS.NOVA. It encompasses scientific publications, presence in the media (opinion editorials, interviews, and debates), participation in and organization of in-person or online events, as well as funded research projects coordinated by CICS.NOVA researchers.

The scientific contributions of CICS.NOVA researchers to discuss and reflect upon these unprecedented pandemic times in the light of social sciences have been prolific. These have sometimes taken the form of conceptual reflections of a more general nature, but have mainly focused on specific topics: the process of adaptation to distance learning, teaching strategies, and adaptation of informal communities of practice; levels of literacy in science and

health; the prevalence of gender violence and domestic violence; the different pandemic temporalities; telework, burnout, networking, and the accentuation of social inequalities (especially the rising unemployment and poverty); the (re)organization of healthcare systems and training of health care professionals; the impact of isolation/confinement on young and old people (either in their own homes or in residential structures for elders); life in the cities and rural areas and geographical particularities; implications on tourism, housing policies and nightlife sector; farming, food diet and environmental challenges; governmental mass surveillance and social activism.

It is worth noting the two CICS.NOVA projects selected – among 16 – within Fundação para a Ciência e a Tecnologia “GENDER RESEARCH 4 COVID 19” call:

- “O impacto da COVID-19 na violência contra as mulheres: uma análise longitudinal”, coordinated by Manuel Lisboa and with a multidisciplinar team (CICS.NOVA as tenderer/proponent);
- “VD@Covid19 – Violência nas relações de intimidade em tempos de Covid-19: desigualdades de género e (novos) contornos da violência doméstica”, coordinated by Sónia Dias and with the participation of Maria João Leote and Vera Duarte (CICS.NOVA as partner);
- “#Unstereotyped: Análise, avaliação e detecção automática de linguagem estereotipada na comunicação pública de prevenção e combate à COVID-19”, coordinated by Rosalina Pisco Costa.

It is also worth highlighting three seminars/webinars on the theme:

- Seminar cycle “Momentos Covid-19: Reflexões Críticas em tempos de Pandemia”, launched by CICS.NOVA.UÉvora (June 2020), that has resulted in a special issue;
- Webinar “Youth and Covid”, organised jointly by Observatório da Juventude dos Açores and CICS.NOVA.UAC, UAC (September 24, 2020);
- Webinar “Reflexões Sociológicas em torno da Covid 19”, organised by CICS.NOVA.UMinho (December 3, 2020).

Nevertheless, the majority of the contributions are on a specific topic and rarely involve researchers from different RGs. Therefore, the COVID-19 Social Studies Hub, created within the set of initiatives developed in 2020 by the Labid – Laboratory of Ideas, aspires to be an interdisciplinary collective in the field of social sciences, which aggregates and creates synergies between CICS.NOVA researchers who are developing studies and/or reflections on the societal impact of COVID-19 pandemic on ways of life, organizations, and territories. It will thus work in close coordination with the COVID-19 Social Sciences Lab, but it intends above all to promote a program of joint integrative and multilateral activities within the scope of CICS.NOVA, covering the aspects of training, research, and networking around this theme.

This Hub will seek to be a driving force for research aimed at the production of scientific knowledge on this topic, always focusing on the transversality of approaches on the articulation between the various Research Groups, on the connection of

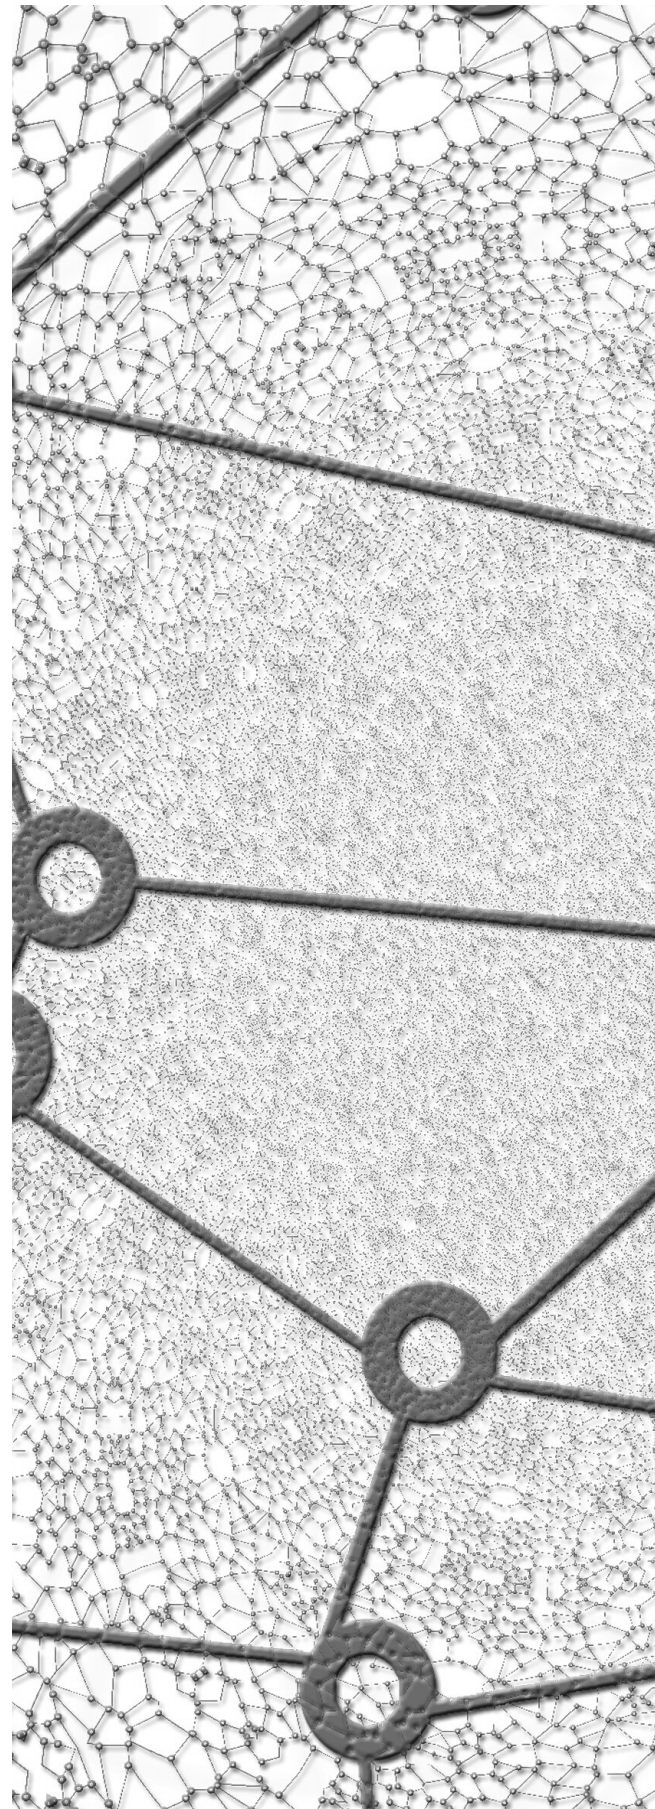

CICS.NOVA with the civil society and, equally, in the greater visibility of the centre and of its work. One example was the Autumn Labid Talk held in December 2021, with Márcia Grisotti (University of Santa Catarina, Brazil) as Keynote Speaker, on “Contaminated Death: The experience of death by Covid-19 from the perspective of health professionals”. The initiative also featured two other participations from CICS.NOVA researchers who presented the results of their research on the impacts of the COVID-19 pandemic on the life of cities and on higher education, respectively.

During 2020, preparatory work also took place regarding the organization of online events such as the cycle “Ciências Sociais à Conversa”, which aims to create a space for dialogue between social sciences and civil society actors. "Rethinking the reactivation of the nightlife sector in times of pandemic" was the theme of its first session, held in July 14, 2021, with the participations of Jordi Nofre (CICS.NOVA, NOVA FCSH), Paula Guerra (Institute of Sociology, University of Porto), Gonçalo Riscado (Musicbox, CTL) and Daniel Pires (Maus Hábitos).

SCIENCE IN SOCIETY

2020, was the year when CICS.NOVA started to participate more actively in social media. During this year, we reformulated our webpage, extended our Facebook presence, and initiated accounts on Instagram, Twitter, and YouTube. These channels allowed us to communicate our activities and to share many initiatives with CICS.NOVA's research community and beyond. This was particularly critical in a year in which we spent long periods confined in our homes and unable to go to our research centre, libraries, and universities. Despite the pandemics, CICS.NOVA extended its participation in projects of knowledge co-creation involving a diverse set of non-academic stakeholders and in projects supporting policy design. Also in 2020, we were involved in a diverse set of scientific outreach activities and major media channels extensively covered our work.

CICS.NOVA reinforced its commitment to Open Science, to make scientific knowledge available, accessible, and reusable to the scientific community and society in general.

CICS.NOVA IN THE SOCIAL MEDIA

During 2020, CICS.NOVA improved its presence in social media through its webpage and Facebook, Instagram, Twitter, and YouTube accounts.

KNOWLEDGE CO-CREATION AND KNOWLEDGE4POLICY

The joint production of knowledge between our researchers and the industry, governmental and non-governmental organisations has been a pillar of CICS.NOVA's activities from its foundation. Such activities are, many times, articulated with the development of a comprehensive set of tools to inform public policy. In 2020, this continued to be the case with all research groups actively participating in

knowledge co-creation and knowledge for policy efforts raising to a total of 39 financed projects in areas as diverse as domestic violence, substance abuse, environment, urban housing, crime and education, among many others. The following list exemplifies our activities.

HIGHLIGHTS

The project “**Lisboa + Igualdade - Espaço de Atendimento a Vítimas de Violência Doméstica**” warrants and evaluates a programme for personalized telephone and face-to-face assistance of victims of domestic violence in the Lisbon municipality. It is a partnership between CICS.NOVA (ONVG), the Câmara Municipal de Lisboa (that finances the project) and the non-governmental association “FEM - Feministas em Movimento”. Available at <https://www.lisboa.pt/atualidade/noticias/detalhe/centro-municipal-lisboa-igualdade-apoia-vitimas-de-violencia-domestica>

The “**Inquérito Nacional ao Consumo de Substâncias Psicoativas na População Geral**” evaluates the profiles of psychoactive substance users in Portugal. It is financed by SICAD - Serviço de Intervenção nos Comportamentos Aditivos e nas Dependências.

The project “**JOVITEMPREGO - Trajetórias de desemprego, vivências e percursos de vida dos jovens na ilha de São Miguel**” aims to study and define intervention strategies to address the impacts of unemployment on the life trajectories of the Azorean youth. This project is a partnership between CICS.NOVA, Fundação Gaspar Frutuoso and the Universidade dos Açores. It is financed by the Direção Regional da Ciência e Tecnologia (Açores).

The project “**A-Place**” is a co-creation project aiming to strengthen the bonds between people and places through the

development of site-specific art, creative spatial practises and cultural projects. It is financed by the Creative Europe programme of the European Commission and involves multiple stakeholders including universities, civil society associations, municipalities, among others.

The project “**VITIPOLIS - A Segurança na Cidade de Lisboa**” aims to develop proposals to improve the Community Policing program in Lisboa and to contribute for the development of public policies tools of crime prevention and policing models promoting participatory citizenship. The research centre IPRI.NOVA and the Polícia Municipal de Lisboa are partners in this project. It is financed by the Câmara Municipal de Lisboa. Available at

The project “**Reavaliação Da Capacidade De Carga - Observação De Cetáceos No Estuário Do Sado**” evaluates whether prohibited areas or specific periods for the observation of cetaceans in the Sado estuary should be established. It involves public (Instituto de Conservação da Natureza e das Florestas) and private (Troia Natura SA) partnerships.

The project “**ESCXEL - School Network for Excellence**” is based on a partnership between CICS.NOVA, municipalities, school units among other social actors. Its main goal is to foster a continuing endeavour to improve quality and performance in its schools. It is financed by the municipalities of Amadora, Cascais, Castelo Branco; Constância, Entroncamento, Ferreira do

Alentejo, Mação, Oeiras, Sardoal, Sertã and Vila de Rei. It is further supported by the Secretaria Regional de Educação of Madeira, by EPIS- Associação Empresários pela Inclusão and by the Comunidade Intermunicipal do Médio Tejo.

SCIENTIFIC OUTREACH

During 2020, CICS.NOVA researchers participated in diversified scientific outreach activities that range from online publications, to podcasts or videos. The following examples illustrate this work.

EUROPEAN RESEARCHERS' NIGHT

CICS.NOVA was represented through the following activities:

All hands on deck! Learning with Azorean fishing communities. Communication by Alison Neilson (CICS.NOVA) and Rita São Marcos (CES-UC) on everyday practices of Azorean fishermen and fisherwomen.

Alimentar Boas Práticas: Da Produção ao Consumo Sustentável. Ebook and interview of Cecília Delgado on innovative food production and consumption practices.

Know+ Value+ Avis. Video presentation by Maria da Saudade Baltazar and other team members of CICS.NOVA.UÉvora focusing on territorial sustainability through the preservation of the natural and cultural heritage of Avis.

Weekly online publication “Destaq’Art – Artes da cidadania” gives visibility to creative work as an exercise of citizenship and political action.

Interview program “Artes da Cidadania em Conversa” explores how different youth actors use certain resources and creative grammars as a form of political expression and participation in the public sphere.

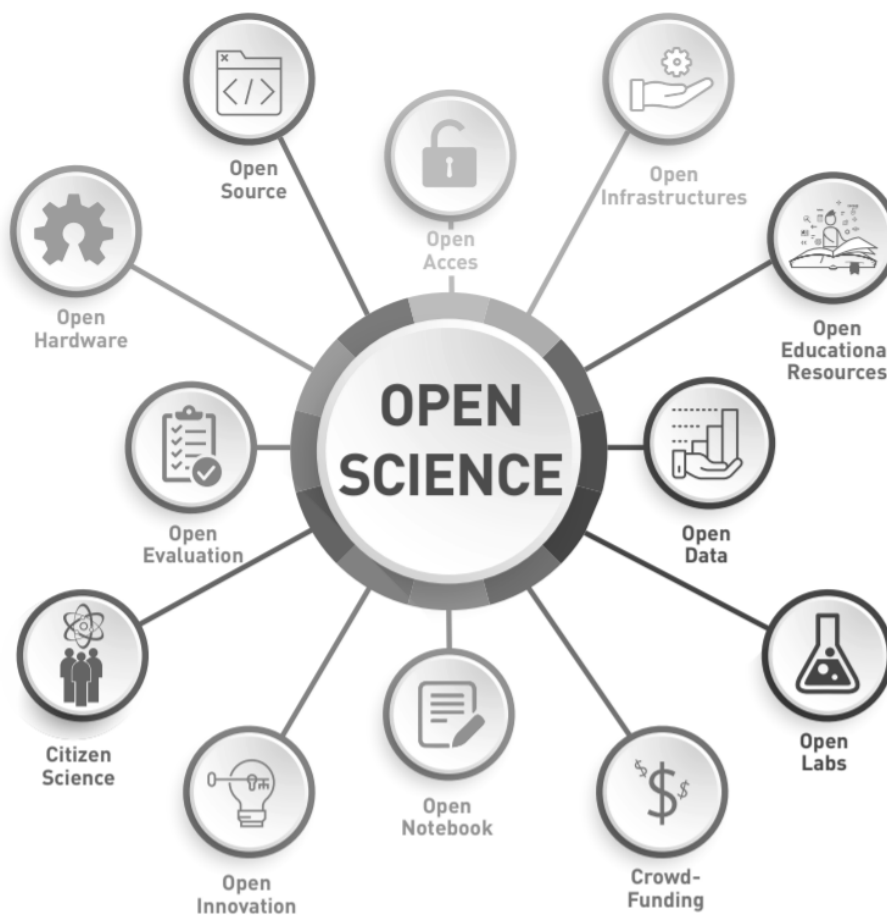

Podcast “Embriões” discusses the multiple meanings attributed to in vitro embryos.

OPEN SCIENCE AND CICS.NOVA

CICS.NOVA is fully committed to Open Science policies, to make scientific knowledge available, accessible, and reusable to the scientific community and society in general.

The promotion and implementation of Open Access in our researchers' publications, but also in our own editions, is part of that commitment.

MEDIA PRESENCE

The presence of CICS.NOVA's researchers in the media was outstanding during 2020. All major TV channels, newspapers, radio stations and other media channels, covered relevant outputs of our research projects ranging from domestic violence to poverty; from telework to social media; from urban

studies to health and education. The impacts of the COVID-19 pandemic in these different areas of CICS.NOVA's expertise were a major topic of concern during this year, and media channels recognised the work of our researchers.

TV CHANNELS: HIGHLIGHTS

Interview with Dalila Cerejo on domestic violence during the Covid pandemics. TV channel: RTP3; Programme: 360, 10th of November.

Interview with Lidia Marôpo on social media influencers. TV channel: SIC Notícias; Programme: Grande Reportagem, 9th of July.

Interview with Iva Pires with food waste. TV channel: RTP1; Programme: Linha da Frente, 9th of January. Available at

Interview with José de São José on the impacts of social confinement on elderly people. TV channel: SIC, 14th of April.

NEWSPAPERS: HIGHLIGHTS

Interview with Fernando Diogo on the impacts of poverty on education in theAzores. Diário de Notícias, 23rd of October.

Interview with António Brandão Moniz on telework. Público, 1st of May.

Essay by João Seixas on alternative urban models. Público, 12th of June.

Interview with Rui Pedro Julião on the impacts of the Covid pandemics on physical exercise. Visão Saúde, 26th of May.

Opinion article by Ana Paula Gil on the practices of care of the elderly population in Portugal during the pandemics. Observador, 27th of September.

RADIO STATIONS: HIGHLIGHTS

Interview with Ana Maria Brandão regarding her research project “Family and non-normative sexualities”. Antena 1, Programme: 90 seconds of science, 16th September.

Interview with Nuno Boavida regarding his research project “InteliArt”, winner of the Santander-Nova collaborative research award. TSF, 29th of September.
