STATEMENT OF THE DIRECTRESS

Over the past several years, CICS.NOVA has evolved into a true home for researchers, PhD students, and support staff; a place where individuals come together not only to work, but to thrive, learn, and contribute to a shared mission. Our collective efforts have reinforced a strong sense of identity within our community, fostering a culture of excellence, innovation, rigor, and collaboration. This has been instrumental in addressing critical challenges across the social sciences, driving impactful research, and shaping the future of knowledge. It has been profoundly rewarding to see how this environment has nurtured not only intellectual growth but also a sense of belonging, ensuring that every individual, regardless of their role, feels valued and connected to a larger purpose.

I am particularly pleased to reflect on the remarkable progress we made in 2022 and 2023, which stands as transformative years for the CICS.NOVA community. Emerging from the challenges of the COVID-19 pandemic, we experienced a powerful resurgence of energy, enthusiasm, and creativity. Our research spaces, once silent, came alive again with dynamic discussions and social interactions, while our facilities reopened their doors with renewed vitality and purpose. But more importantly, our scientific work flourished. These two years proved that the true strength of our community lies not only in its resilience but in its extraordinary ability to adapt and innovate in the face of adversity.

One of the most significant milestones during this period was the fine-tuning of our strategy for scientific leadership – what we have come to call “the turning point”. This was a decisive step forward in realizing the ambitious strategic vision we set in motion in 2020. The accomplishments of 2022 and 2023 have laid a solid foundation for the year ahead, 2024 – a pivotal year as we transition between two periods of FCT funding. I am immensely proud to say that CICS.NOVA has not only met its goals but has surpassed them in several key areas. We have expanded the impact of our scientific endeavours through groundbreaking innovation, reinforced by strategic partnerships and a sharpened focus on the social relevance of our research. Furthermore, our unwavering commitment to scientific employment – attracting and retaining outstanding talent – has been a cornerstone of our success, helping us build a robust and dynamic research ecosystem.

These achievements have positioned us exceptionally well for the next phase of our journey. As we prepare for the FCT evaluation process of R&D Units for 2023-2024, I am confident that CICS.NOVA is not only ready to meet the challenges ahead but is poised to continue its trajectory of growth, innovation, and meaningful contribution to society. The dedication, focus, and collective effort we have sustained will undoubtedly serve us well as we move forward.

As I prepare to step down from my role as Directress of CICS.NOVA, I want to take a moment to express my deepest gratitude to all of you. Serving this centre has been one of the most rewarding experiences of my professional life, and it has been an absolute honour to work alongside such an extraordinarily talented, passionate, and committed group. The sense of shared purpose that unites us is rare, and the collaborative spirit we have cultivated is something I will cherish long after my term comes to an end.

Throughout my time at CICS.NOVA, we have achieved incredible milestones – advancing knowledge, breaking new ground in research, and building partnerships that have had a tangible impact both within academia and beyond. These accomplishments are a testament to the hard work, creativity, and determination of each and every one. I am incredibly proud of what we have built together, and I have no doubt that the seeds we have sown will continue to bear fruit for many years to come.

Yet, beyond the professional achievements, it is the personal connections, the friendships, and the deep sense of community that I will remember most fondly. Every day, I have been inspired by the curiosity, integrity, and resilience that each of you brings to your work. It is this spirit that has made CICS.NOVA not just a centre for research, but a true community, where people support one another, and grow together.

Though I may be stepping down from my formal responsibilities, my connection to CICS.NOVA and its mission remains as strong as ever. I have every confidence that the centre will continue to flourish under new leadership, and I look forward to seeing the extraordinary work that will emerge in the years ahead. I have no doubt that the future of CICS.NOVA is bright, and I will be cheering you on from the sidelines, filled with pride and optimism.

Thank you all for your unwavering support, your trust, and your collaboration throughout the years. It has been a profound privilege to be part of this exceptional journey, and I wish each of you continued success, fulfilment, and inspiration in all that you do. May you continue to push the boundaries of knowledge and make a lasting difference in the world through your work.

Helena M R Serra

ORGANISATION

MISSION

CICS.NOVA's mission is to conduct interdisciplinary research in Social Sciences, to promote critical thinking and disseminate the acquired knowledge in the concerned communities, both on the national and international level. CICS.NOVA assigns a particularly relevant role to teaching and advanced training, through the coordination and participation in several Doctoral programs, Master's and open courses, and by welcoming researchers in academic training. An equally important contribution is the co-creation and knowledge transfer alongside policymakers, companies, and other civil society organizations, particularly through the activities developed by the Observatories and Laboratories. CICS.NOVA also fosters the dissemination and communication of science and knowledge through a strong presence in the scientific community and in the public space. These priorities are guided by the interdisciplinary study of territorial systems and human behaviour, the particularities of the institutions' functioning and their relations with the surrounding spatial and social contexts.

FUNDED PHD STUDENTS

Coordinator Ricardo Campos

RG2 IN 2022

In 2022 RG2 consisted of 36 integrated researchers and 22 PhD students. Our team has been involved in several successful applications to project calls. We highlight the coordination by RG2 researchers of 10 funded projects, either by national or international funding agencies.

Overall, RG2 maintained its level of scientific productivity, publishing several articles in highly relevant scientific journals, particularly international ones. RG2's work resulted in 115 publications of various types. Of these, we highlight that 46 were articles in peer-reviewed journals. We emphasize the increasing impact and internationalization of our researchers' work, with the publication of 32 articles in Q1/Q2 international journals. Additionally, we should mention the publication of 32 book chapters and, finally, the editing or coordination of 10 books, the majority of which were published by prestigious international academic publishing houses.

Members of our research group were also directly engaged in organizing 8 international scientific events, most of which had

CICSNOVA as an organizing partner or member. Noteworthy events include the 3rd edition of the annual international conference “COMbART: Art, Activism, and Citizenship”; the European congress “Uma Justiça Amiga das Crianças. Direitos Humanos e a Criança” [A Child-Friendly Justice. Human Rights and the Child]; the first international seminar “Youth and Citizenship,” in partnership with Sergipe University (Brazil); the international conference “Asymétries Territoriales: Enjeux Socio-Environnementaux et Facteurs d’Inégalités”; and, finally, the “Global Meeting on Law and Society: Rage, Reckoning, & Remedy.”

NATIONAL AND INTERNATIONAL FUNDED PROJECTS IN 2022

“IC – Data for MOnitoring the SAfety of Imprisoned Children” – Citizens, Equality, Rights and Values Programme (CERV), led by Penal Reform International

“IN SITU: Place-based innovation of cultural and creative industries in non-urban areas”, European Commission – HORIZON-CL2-2021-HERITAGE-01-03 – Cultural and creative industries as a driver of innovation and competitiveness, Grant agreement ID: 101061747

“Cyber-Delinquency@Child-Justice” (C@CJ) (CEEC INDIVIDUAL FCT)

“Discursos de Ódio nas Redes Sociais: Um olhar sobre a Juventude Açoriana” [Hate discourses on social media: a perspective on azorean youth]; Financed by Azores Youth Observatory

“Link Me Up – 1000 ideias – Sistema de Apoio à co-criação de inovação, criatividade e empreendedorismo”, financed by Compete 2020, Portugal 2020 and the European Union through the European Social Fund.

RG2 in 2023

In 2023, RG2 consisted of 35 integrated researchers (14 based in Lisbon – NOVA FCSH, with the remaining based in our regional hubs – 12 at Minho University, 3 at the University of the Azores, 4 at Leiria Polytechnic, and 2 at the University of Évora). This number included 4 full-time researchers (3 under contract and 1 with a post-doc scholarship) and 8 PhD students (5 of whom are grant holders – FCT grants).

RG2 researchers continue to be engaged in several relevant scientific activities. Twelve of our researchers are directly involved in various competitively funded research projects, either national or international. We emphasize that our team has been strengthened by the integration of a post-doc researcher who won a CICSNOVA scholarship to carry out her project, "Deconstructing Urban Policing: The Importance of Human Rights in Everyday Police Practices in Portugal (DECONPOL)." The goal of the project is to study police practices, understand how they are constructed, and provide a vantage point on power relations between the police and society.

We remain highly active in the dissemination of our scientific endeavors. RG2's work resulted in 101 publications, representing a slight decrease compared to last year. We published 40 articles in peer-reviewed journals, including 27 articles in Q1/Q2 international journals. Regarding books, we published 31 chapters and authored or coordinated 11 books. RG2 researchers were also actively involved in organizing several national and international scientific events. Overall, 11 events were held with the direct involvement of our members in the organizing committees. We highlight the international conferences COMbART: Art, Activism, and Citizenship, held at NOVA FCSH in July, and the AGEING CONGRESS 2023 in May.

Furthermore, our researchers were responsible for leading and co-organizing other important scientific meetings, particularly aimed at the scientific community, such as CICS.NOVA's Social Science Labs: Ethics and Responsibilities in Qualitative Research (4 sessions with international guest speakers), held in different hubs of CICSNOVA; the Webinars on Social Justice in a Digital Society (3 sessions with international guest speakers);

and the seminar: History and Sociology of Science.

NATIONAL AND INTERNATIONAL FUNDED PROJECTS IN 2023

ic - Data for Monitoring the Safety of Imprisoned Children. Funded by the European Union (CERV-2022-DAPHNE, 101096692)

SMOOTH - Common goods in education and active social inclusion. European Commission – Horizon 2020 - Grant agreement ID: 101004491

CYTED; Cambiar la evaluación: transformación inclusiva de la investigación en Iberoamérica (EVINC)

Stress-induced neuroinflammation: mechanisms and implications for decision-making and performance; Prémio de Investigação Colaborativa Santander Totta – Universidade NOVA de Lisboa 2017/2018

Cost Action, CA20137 - Making Young Researchers' Voices Heard for Gender Equality (VOICES)

RG3 IN 2022

In 2022, RG3 endeavoured to expand its research impact, successfully securing funding and generating significant academic outputs. The Bertarelli Foundation supported the project "Human dimensions of the blue horizon" while the Erasmus+ KA2 program funded "Read4Succeed," focusing on improving reading skills of migrant, refugee, and underprivileged children through animal-assisted methods. Researchers produced numerous articles for highly regarded journals, including Cities, Sustainability, People and Nature, and the Journal of Iberian and Latin American Economic History, contributing substantially to their respective fields. RG3's commitment to scientific training was evident in the successful completion of 4 doctoral and 25 master's theses across diverse programs such as Sustainable Urbanism, Human Ecology, Sociology, Anthropology, and Tourism Management, underscoring the group's dedication to advancing interdisciplinary knowledge.

RG3 IN 2023

In 2023, the RG3 team achieved significant progress in its research activities and outputs. The FCT supported a CICS.NOVA project examining COVID-19's impact on Portugal's housing market and an RG3 team joined the Horizon Europe-funded MOSAIC project, addressing climate change and biodiversity loss. Researchers published extensively in prestigious journals, including *Urban History*, *Etnográfica*, *European Planning Studies* and *ACME*. Notable editorial contributions included special issues on "Urban Transitions and Dynamics" (*Land*) and "Nocturnal Cities" (*Forum Sociológico*) and chapters in books by international publishers, such as Routledge or Palgrave, but also by widely reconized publishers in Portuguese society, such as Almedina, thus reaching diferent publics. RG3's dedication to scientific training was evidenced by the supervision of 5 doctoral and 17 master's theses across diverse programs such as Sociology, Urban Studies, Sustainable Urbanism, and Human Ecology.

RG4 IN 2022

In 2022, the group actively participated in several workshops and conferences, either as invited speakers or through oral presentations, organized an open-lecture and a 5-days course.

The group published 8 papers: 4 in Scopus and/or WOS' journals (3 of them in Q1 & Q2 journals), 1 paper in non-indexed peer-reviewed journals, 1 international book chapter indexed in Scopus, 1 international book chapter and 1 national book chapter. RG4 researchers also coordinated 1 journal special issue indexed in Scopus and/or WOS' and 2 non-indexed peer-reviewed journals, and 11 conference proceedings with peer-review, making a total of 22 publications.

R&D PROJECTS IN 2022

RG4 has 1 Research & Development project running funded by other Governmental Institutions:

- 2020-2022 Reavaliação da capacidade de carga – observação de cetáceos no estuário do Sado; Funding entity: Tróia-Natura, S.A.; FCSH budget: 42.000€

ADVANCED TRAINING IN 2022

RG4 researchers oriented 2 PhD thesis and 25 Master Thesis.

SCIENTIFIC EMPLOYMENT AND RUNNING GRANTS (RESEARCH AND INDIVIDUAL PROJECTS) IN 2023

The Group had 2 FCT Norma Transitória individual projects:

- Participatory modelling of land-use and land-cover to support Smart Spatial Planning and Decision Making, Funding entity: FCT Norma Transitória; 2019-2025; aprox. 188000€
- Planning tools to promote environmentally sustainable and livable cities, Funding entity: FCT Norma Transitória; 2019-2025; aprox. 188.000€

SCIENCE STORIES 2022

EFFECTS OF THE COVID-19 PANDEMIC ON THE LIVES OF WOMEN WITH DIFFERENT SOCIOECONOMIC BACKGROUNDS AND VICTIMIZATION EXPERIENCES IN PORTUGAL

Social Sciences

Ana Lúcia Teixeira et al. | RCI

The heavy economic, social, and psychological toll of pandemic lockdowns around the world and their disproportionate effect on women are widely acknowledged, but different socioeconomic backgrounds and contexts may influence the degree to which stay-at-home measures impact their lives. Additionally, knowing that violence against women tends to increase during times of crisis, we are testing if the additional burden of victimization represents an added load to the perceived social impacts of the lockdown. Using 2021 survey data from a random sample of 1541 Portuguese women, the paper explores, through logistic regression models, the social impact of the lockdown on the lives of women, its socioeconomic determinants, and the role played by violence against women during the pandemic. The results show that the COVID-19 pandemic lockdown did not equally affect all facets of women's social lives, and women with higher education status and that experienced income reductions due to the measures taken to control the pandemic are more prone to experience a more severe negative impact of the lockdown on the various facets of their lives. Additionally, having been a victim during the pandemic partially mediates the effect of education and income reduction on the social outcomes of the lockdown.

SCIENCE STORIES 2022

DYSREGULATED ERYTHROID Mg^{2+} EFFLUX IN TYPE 2 DIABETES

Frontiers in Cell and Developmental Biology

Ana Ferreira et al. | RG2

Hyperglycemia is associated with decreased Mg^{2+} content in red blood cells (RBC), but mechanisms remain unclear. We characterized the regulation of Mg^{2+} efflux by glucose in ex vivo human RBC. We observed that hemoglobin A1C (HbA1C) values correlated with Na^{+} -dependent Mg^{2+} efflux (Na^{+}/Mg^{2+} exchange) and inversely correlated with cellular Mg content. Treatment of cells with 50 mM D-glucose, but not with sorbitol, lowered total cellular Mg (2.2 ± 0.1 to 2.0 ± 0.1 mM, $p < 0.01$) and enhanced Na^{+}/Mg^{2+} exchange activity [0.60 ± 0.09 to 1.12 ± 0.09 mmol/1013 cell \times h (flux units, FU), $p < 0.05$]. In contrast, incubation with selective Src family kinase inhibitors PP2 or SU6656 reduced glucose-stimulated exchange activation ($p < 0.01$). Na^{+}/Mg^{2+} exchange activity was also higher in RBC from individuals with type 2 diabetes (T2D, 1.19 ± 0.13 FU) than from non-diabetic individuals (0.58 ± 0.05 FU, $p < 0.01$). Increased Na^{+}/Mg^{2+} exchange activity in RBC from T2D subjects was associated with lower intracellular Mg content. Similarly increased exchange activity was evident in RBC from the diabetic db/db mouse model as compared to its non-diabetic control ($p < 0.03$). Extracellular exposure of intact RBC from T2D subjects to recombinant peptidyl-N-glycosidase F (PNGase F) reduced Na^{+}/Mg^{2+} exchange activity from 0.98 ± 0.14 to 0.59 ± 0.13 FU ($p < 0.05$) and increased baseline intracellular Mg content (1.8 ± 0.1 mM) to normal values (2.1 ± 0.1 mM, $p < 0.05$). These data suggest that the reduced RBC Mg content of T2D RBC reflects enhanced RBC Na^{+}/Mg^{2+} exchange subject to regulation by Src family kinases and by the N-glycosylation state of one or more membrane proteins. The data extend our understanding of dysregulated RBC Mg^{2+} homeostasis in T2D.

Dysregulated Erythroid Mg^{2+} Efflux in Type 2 Diabetes

PROTECTING GREAT APES FROM DISEASE: COMPLIANCE WITH MEASURES TO REDUCE ANTHROPONOTIC DISEASE TRANSMISSION

People and Nature

Ana Nuno et al. | RG 3

1. The emergence of infectious diseases, such as COVID-19, impacts livelihood strategies and conservation tools reliant on human-wildlife interactions, such as wildlife-based tourism and research. This is particularly relevant to great ape conservation, as humans and great apes are susceptible to being infected by similar pathogens.
2. Evidence-based strategies are required to prevent infectious disease transmission to great apes and people involved in, or living close to, tourism sites. The development of disease-safe recommendations and their effective operationalisation require an understanding of what affects visitor compliance.
3. Based on an international sample of past (N = 420) and potential future visitors (N = 569) to wild great ape tourism sites in Africa, we used an online questionnaire to characterise visitors' practices, assess expectations (e.g. about proximity to great apes) and identify key factors related to potential compliance with disease mitigation measures. This was implemented adapting a framework from health literature (the Health Belief Model; HBM), particularly focused on reducing COVID-19 transmission at an early stage of the pandemic.
4. Visitors expressed less willingness to being vaccinated against COVID-19 (which, at the time our survey was conducted, had only just started being administered to very high-risk groups), wearing a facemask during trekking (although willing when viewing the apes) and quarantine after international travel before visiting great apes. Region of nationality, expectations about the visitor experience and perceived effectiveness of specific measures were important factors explaining variation in potential compliance across multiple behaviours.
5. By gaining a better understanding of what fosters compliance with disease mitigation measures, we obtained insights that are essential for assessing feasibility, facilitating effective communication, and guiding implementation at great ape tourism sites with importance not only for COVID-19 but also for other infectious diseases more broadly, particularly at early stages of future pandemics. While requiring adaptive management as situations evolve (e.g. vaccination becoming more widely accessible), these will contribute towards a more sustainable visitor experience that can effectively deliver positive outcomes for people and biodiversity.

SUSTAINABLE LIVING NEIGHBORHOODS: MEASURING PUBLIC SPACE QUALITY AND WALKING ENVIRONMENT IN LISBON

Geography and Sustainability

Teresa Santos et al | RG4

Obesity and global warming are two major challenges that affect communities' health and quality of life. Providing good walking environments, with appropriate pedestrian infrastructure, green areas and access to commercial retail and transport hubs favour liveable, healthy, and sustainable cities. The Lisbon City Hall has implemented an intervention program in the public space as a strategy to improve environmental quality and mitigate the effects of climate change. The program "A square in each neighbourhood" intends not only to reinforce the economic base of Lisbon, namely tourism, restaurants, commerce, and creative activities but also to promote physical activity and improve the quality of living of all citizens. For studying the impact of the public space quality on the walking environment, Campolide, a typical Lisbon neighbourhood, Portugal, which includes one of the requalified squares, was selected. A two-step methodology based on spatial modelling is proposed. In the first step, the public space quality was evaluated based on a set of 13 urban quality attributes. Attributes, intended for the street level, were collected from open data platforms and complemented with a field survey. Then, through spatial analysis, these attributes were used to build the Pedestrian Environment Quality Indicator and the Priority Intervention Indicator. Using these indicators, walking-friendly streets were mapped and the most critical sites that require priority intervention were identified to prepare for the requalification planning process. The street with the highest quality in the study area according to the dimensions evaluated - connectivity, convenience, comfort, cleanliness, and conviviality - has a great offer of trees, bus stops, commercial establishments, commercial diversity, crossings, paper bins/eco points and esplanades. On the opposite side of the rank, the street with the lowest quality has no trees or green areas, transport stops, benches and tables, or commercial activity. The urban quality indicators constitute a helpful tool for city planners and policymakers when planning sustainable living neighbourhoods.

‘FOCUSING AND UNFOCUSING’—COGNITIVE, EVALUATIVE, AND EMOTIONAL DYNAMICS IN THE RELATIONSHIP WITH HUMAN EMBRYOS AMONG ART BENEFICIARIES

Societies

Luís Gouveia et al | RG5

This article uses data gathered from a study conducted in Portugal to examine the (plural and composite) conceptions that doctors, embryologists, and beneficiaries of Assisted Reproductive Technology (ART) have of the in vitro human embryo. Taking the sociology of engagements, developed by Thevenot, as its theoretical lens, the article draws on a total of 69 interviews with ART patients to analyse the plurality of fluid meanings produced about this biological entity, whose status is neither static nor universal. ART beneficiaries are likely to produce plural conceptions of the lab-generated embryo within the framework of different regimes of engagement, understood as cognitive and evaluative formats. These various pragmatic regimes, in turn, entail distinct emotional investments. When speaking about their relationship with embryos, beneficiaries therefore express plural emotional experiences, which are articulated using terms such as affection, love, detachment, loss, frustration, hope, mourning, and anguish. Using the theoretical framework of the sociology of engagements, we propose an approach that enables us to produce a detailed record of the connections between the cognitive, evaluative, and emotional dimensions in beneficiaries’ relationship with—and decision-making processes about—the embryos, accounting for the plasticity of emotional states linked to the (re)configuration of attributed meanings.

HOW PHOTOS CAN AFFECT CHILDREN'S PERCEPTION OF ANIMAL WELFARE: A STUDY INVOLVING PUPILS FROM PORTUGAL AND SPAIN

Children & Society

António Almeida et al | RG6

This study aimed to identify perceptions of animal welfare in pupils from Portugal and Spain. Two versions of a questionnaire were designed. Each included one of a pair of photos for the same context, three out of six, intended to generate a positive perception of animal welfare. The results were similar in both countries and by sex, supporting the idea that the framing of photos can manipulate the children's perception of animal welfare. The importance of the development of visual literacy in children, as a way to better interpret the implicit and explicit messages proposed by photos, is recommended.

(SEMI)HIDDEN AND MANIFEST TRANSCRIPTS IN FORMS OF LIVING AND RESIDING: THE 'SOCIAL HOUSING' NEIGHBOURHOOD IN ANDORINHAS

Sociologija i Prostor

Manuel Carlos Silva et al | RGI

This paper discusses the results of a research developed at Andorinhas neighbourhood, created in the early 1980's in Braga. It is based on quantitative and qualitative data resulting from the application of a survey, semi-structured interviews and life narratives. This plural methodology allowed for the analyses of the objective living conditions, habits and ways of life, relationships and representations not only between various groups of the community, as well as the relations between the neighbourhood inhabitants and the surrounding society, including the institutions and public powers (police, court, social security, services, media and especially municipal housing company BragaHabit). The results suggest the presence not only of manifest but also (semi)hidden transcripts, both at family and community levels, but rarely in open collective actions for neighbourhood improvements.

Abstract

Purpose

This perspective study aims to discuss the inclusion of technology in hotels as a key driver of sustainability.

Design/methodology/approach

The paper covers literature and prospects the implementation of smart hotels as a tourism agenda to achieve sustainable development goals.

Findings

Smart hotels can provide a better and more efficient tourism service, in terms of operational tasks and sustainable gains, without losing critical human interaction, which can be a tactic to boost the hotel's relationship with their customers.

Originality/value

The paper shows how smart hotels can increase business efficiency, and in addition, meet

THE ROLE OF LAND AS THE CENTRAL PIECE TO SUSTAINABLE FOOD SYSTEMS: LESSONS LEARNED FROM PORTUGAL NATIONAL FOOD-RELATED POLICIES

Geography and Sustainability

Cecilia Delgado | RG3

This paper discusses to what extent land is considered in food-related policies from a systemic perspective. Based on existing literature and international agendas priorities, we argue that access to and preservation of land for food along the food chain play a major role in sustainable food systems. To further explore this argument, we address the following question: Where does land stand in sectorial and national food-related policies? The multiple dimensions and implications of food systems and the international agenda's priorities namely the "Right to adequate Food", "Food Sovereignty" and the "Right to Land", were used as our conceptual framework. To work out how land is being considered in food sectorial policies, both quantitative and qualitative methods were applied to examine ten Portuguese national food-related policies. Results are showing a lack of consideration for land access and land preservation, needed all along the food chain to build a national sustainable food system. On the other hand, there is a gap between current grassroots priorities international agendas and food-related national policies. Such a situation strongly suggests that building a sustainable food system needs a clear food territorial perspective, still neglected, and shifting from sectorial policies towards a more integrated food system approach, that will include land as a central piece.

100 YEARS OF LAND-USE AND LAND-COVER DATA: WHAT HAS BEEN THE EFFECT OF SPATIAL PLANNING IN COASTAL LAND-USE AND LAND-COVER CHANGE?

Raquel Deus et al | RG4

The Sustainable Development Goals require us to rethink spatial planning policies' effectiveness. This article proposes a reproducible method for assessing the effect of past planning practices and simulating future land-use and land-cover (LULC) changes with a Cellular Automata model. The originality of our approach is to systematically compare observed changes in LULC with the planning rules in force over almost a century of evolution. A quasi-exhaustive database was constructed at a very fine spatial resolution for the municipality of Portimão (Southern Portugal), including the location and changes of LULC categories, and the planning rules of the corresponding time period on nine dates between 1947 and 2018. The quantified measurement of the actual effect of planning rules enables us to identify other determinants of the evolution. Findings reveal that the policies established by the local government—which aimed to foster well-planned comprehensive urban areas—were not as effective as intended. The quantified discrepancies between planning recommendations and observed evolution help to simulate which LULC scenarios could be designed to reach the expected result in future planning policies. Our assessment method could be applied in other urban and tourist regions where land artificialization exerts strong pressure on the environment.

(DE)BONDING WITH EMBRYOS: THE EMOTIONAL CHOREOGRAPHIES OF PORTUGUESE IVF PATIENTS

Social Science & Medicine

Catarina Delaunay et al | RG5

In this article we develop the new concept of emotional choreography to describe how patients bond, debond and/or rebond with their embryos created in vitro using assisted reproductive technologies (ART). Using this concept, we explore how the patients' management of their own emotions intertwines with political, scientific, and religious factors. Our analysis relies on and further advances Thompson's concepts of ethical and ontological "choreography". It is through these forms of choreography that complex contemporary biomedical issues with high political, ethical, and scientific stakes are negotiated, and through which different actors, entities, practices, roles, and norms undergo mutual constitution, reinforcement and (re)definition. Our article draws on the analysis of 69 in-depth interviews and the results of an online survey with 85 respondents.

A EMIGRAÇÃO IRREGULAR PARA FRANÇA: REPRESSÃO, TOLERÂNCIA E COLABORAÇÃO, 1957-1974

Ler História

Pedro David Gomes et al | RG6

This article aims to understand the irregular migration networks between Portugal and France (1957-1974), focusing on the relationships between illegal agents (smugglers, recruiters, etc.) and regional and local State agents in the border contexts where irregularities were most prevalent. Starting from the government's contradictory positions on the migration issue and analyzing the effective implementation of migration policies by state agents on the ground, we seek to identify the factors that explain the effectiveness of irregular networks. The study is based mainly on oral sources, complemented with documentation from national, regional, and municipal archives. We argue that the “differentiated management of illegality” within or between state institutions produced duplicities and discretions that compromised the effectiveness of migration regulatory measures, while at the same time reflecting the government's ambiguity in this matter.

LABID

LABID – Laboratory of IDEAS is part of CICS.NOVA, having the goal of contributing to the achievement of the main objectives of the strategic development of this research unit. It is a Permanent Interface Structure to support and stimulate innovation, promoting scientific innovation by fostering new ideas and original projects, taking a multi and interdisciplinary approach.

KNOWLEDGE HUBS

Dynamic, conjectural, open spaces (to researchers and stakeholders), always with the goal of fostering the interdisciplinary approach to topics relevant to the goals of CICS.NOVA.

- Aggregate researchers, projects, publications, reports, and data;
- Anchored on the CICS.NOVA's website;
- 4 hubs in operation:
 - COVID-19 Social Studies
 - Gender Studies
 - Science and Technology Studies
 - Urban Studies

LABID TALKS

- Place for scientific debate and interdisciplinary research opportunities;
- Simultaneously face-to-face and remote;
- Spring and Autumn editions.

CICS.NOVA EDITIONS

CICS.NOVA is committed to Open Science, to make scientific knowledge available, accessible, and reusable to the scientific community, marketplace and civil society. The promotion and implementation of Open Access in our researchers' publications, but also in our own editions, is part of that commitment to the democratization of the produced knowledge.

The Centre publishes 4 full open access scientific and peer-reviewed journals (Configurações. Revista de Ciências Sociais; Desenvolvimento e Sociedade: Revista Interdisciplinar em Ciências Sociais; Faces de Eva: Estudos sobre a Mulher; and Forum Sociológico), 2 peer reviewed book collections with Húmus Editions (Coleção Diagnósticos & Perspectivas and Coleção Debater o Social), 1 e-book collection, and 1 working papers collection (ComTextos).

We are permanently involved in and committed to discussions and activities of national and international impact to fully implement best practices of scientific publishing. Hence, we continued to be part of the NOVA FCSH Open Science Working Group (GTCA), in which we were particularly active during the activities of the 2022 and 2023 «Open Science Month at NOVA FCSH», an annual event that emerged on the scope of the celebrations of the International Open Access Week 2021 (OA week 2021).

Throughout 2022 and 2023 we were able to implement and consolidate best practices as recommended by international organizations such as COPE (Committee on Publication Ethics), OASPA (Open Access Scholarly Publishing Association), DOAJ (Directory of Open Access Journals) and SPARC Europe. This also translated into a more close and efficient support to our researchers and members of the Editorial Boards of the Centre's editions. Being a R&D Unit also committed to the development of quality interdisciplinary research, we encourage and value in our editions the publishing of collaborative scientific works, by national and international researchers and not exclusively in the Social Sciences, which aims to integrate the produced scientific knowledge to comprehend and respond to the complexity of contemporary societal problems, a perspective fostered and leveraged by a growing number of organizations such as FCT, European Commission and UNESCO.

JOURNALS

Configurações. Revista de Ciências Sociais is an edition of our hub at Universidade do Minho and published 4 original issues between 2022 and 2023:

- Issue 29 | 2022 - Pierre Bourdieu: vinte anos depois, legado e usos de uma prática de investigação sociológica
- Issue 30 | 2022 - Conflito, Negociação e Mediação
- Issue 31 | 2023 - Tráfico de pessoas, antitráfico e perspetivas críticas
- Issue 32 | 2023 - Discriminação e diversidade no trabalho e nas organizações

The journal is indexed in Latindex, EBSCO, Qualis-Capes/Brazil and OpenEditionJournals platforms.

Desenvolvimento e Sociedade: Revista Interdisciplinar em Ciências Sociais is an edition of our hub at Universidade de Évora and published 1 digital thematic issues in 2023.

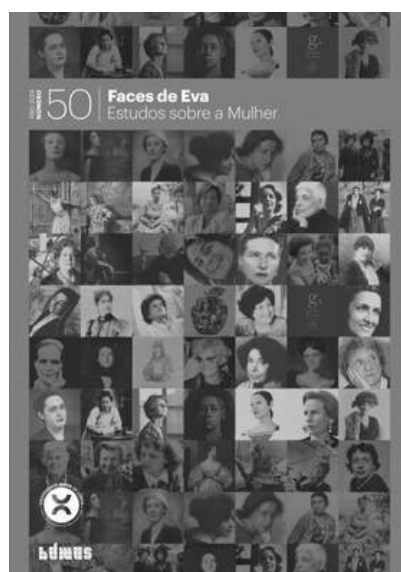

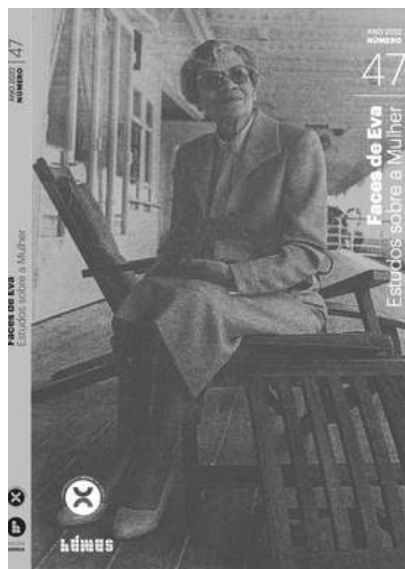

- Issue 11 | 2023 – Territórios de Baixa Densidade.

The journal has been indexed in Latindex since 2016.

Faces de Eva. Estudos sobre a Mulher is also edited twice a year, and it is one of Portugal's most valued and established scientific journals in gender studies.

- Issue 47 | 2022
- Issue 48 | 2022
- Issue 49 | 2023
- Issue 50 | 2023

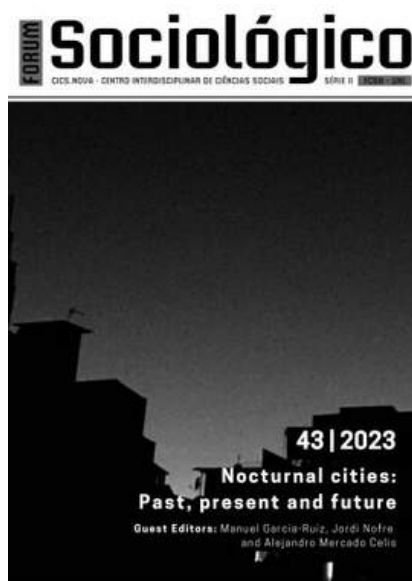

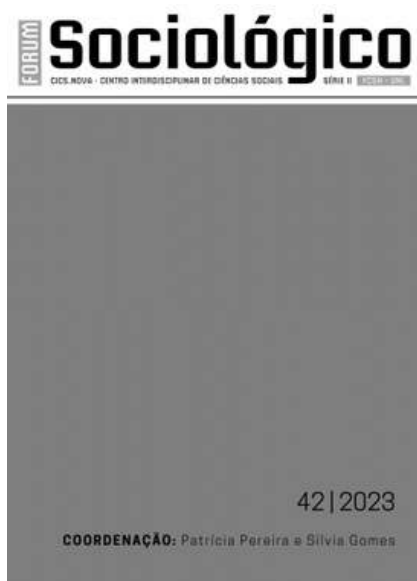

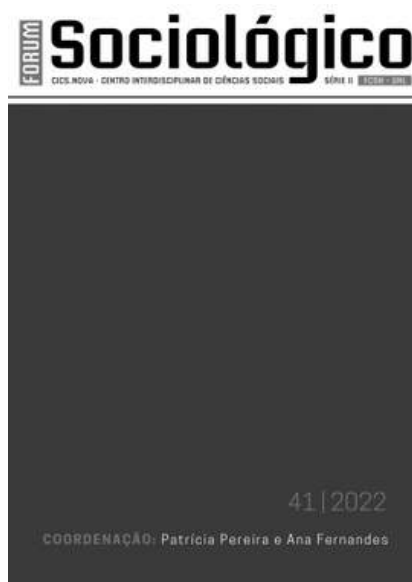

The journal is indexed in SciELO Portugal, Qualis-Capes/Brazil, Latindex, MIAR, ERIH PLUS and EIGE – Eurogender.

Forum Sociológico is a scientific Journal in full open access of NOVA FCSH that published 4 original issues between 2022 and 2023:

- Issue 40 | 2022
- Issue 41 | 2022
- Issue 42 | 2023
- Issue 43 | 2023

The journal is indexed in Latindex, OpenEditionJournals, Qualis-Capes/Brazil, MIAR and ERIH PLUS.

BOOK COLLECTIONS

Coleção Diagnósticos & Perspectivas

(CICS.NOVA/Húmus) is a fully open access book collection in the Social Sciences, mainly without publication fees for authors, which edits its books in print and digital formats and follows an editorial policy of service to the scientific community and culture. All books published are submitted to a scientific peer reviewed process, given a DOI identifier and an ISBN number and immediately made available for readers in the institutional repository of Universidade NOVA de Lisboa – RUN.

Throughout 2022 and 2023 the collection published two volumes:

- 2022 – *Atores da educação musical: Etnografia nos programas socioculturais El Sistema, Neojiba, Orquestra Geração*. Author: Alix Didier Sarrouy.
- 2023 – *Populações, desigualdades e ação pública*. Organisers: Fernando Diogo, Dulce Pimentel, Francisco Sousa, José Lúcio, José Marques, Sandro Serpa and Maria da Saudade Baltazar.

Coleção Debater o Social (CICS.NOVA/Húmus) is a book collection with more than 50 volumes, published in print and digital formats, and edited by our hub at Universidade do Minho.

Throughout 2022 and 2023 the collection published four volumes:

- 2022 – *Juventude(s). Movimentos globais e desafios futuros*. Organisers: Gilberta Pavão Nunes Rocha, Rolando Lalanda Gonçalves, and Pilar Damião de Medeiros.
- 2023 – *Intervenção da educação social com públicos especialmente vulneráveis*. Organisers: Helena M. Carvalho and Carla Carvalho.
- 2023 – *Habitação e habitat: “ilhas” e bairros populares no Porto e em Braga*. Authors: Manuel Carlos Silva, Fernando Bessa Ribeiro, Fernando Matos Rodrigues, Luís Vicente Baptista, António Cerejeira Fontes, Ana Reis Jorge, and António Cardoso.

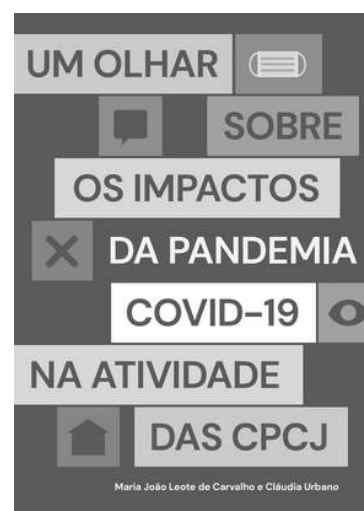

- 2023: *Caixa mágica do agir dos profissionais nas ERPI: prevenção dos riscos da violência sobre os idosos institucionalizados*. Author: Tatiana Mestre.

CICS.NOVA e-book collection is a peer-reviewed digital edition currently being restructured. Its Editorial Board aims for the collection to become a driving agent of dissemination and communication of scientific knowledge in face of a fasting and growing global context of information diffusion. All volumes published within the collection encompass social themes, not exclusively restricted to the national context, and are given a Creative Commons License, DOI identifier and an ISBN number. Research works methodologically grounded in interdisciplinary approaches are also welcomed within.

During 2022 and 2023 the collection has published two e-books:

- 2022 – *Curriculum autonomy policies: International trends, tensions and transformations*. Editors: Sílvia Almeida, Francisco Sousa and Marta Figueiredo.
- 2023 – *Um olhar sobre os impactos da pandemia Covid-19 na atividade das CPCJ*. Authors: Maria João Leote de Carvalho and Cláudia Urbano.

SCIENCE MANAGEMENT

CICS.NOVA is supported by the collaboration of 6 Science and Technology Managers, distributed by the institutional partners (Universidade NOVA de Lisboa, Universidade dos Açores, Universidade do Minho, Instituto Politécnico de Leiria, and Universidade de Évora), that generates support for scientific research.

The science management team collaborates in scientific and financial management (including projects pre and post award), science dissemination and communication (including website, social media platforms, and newsletters), procurement of scientific funding, specialised training, and technical mentoring for grant applications, editions management and support for the R&D Units scientific strategy.

The administrative and financial management of the R&D Unit; in the pre-award research administration (finding funding; budget creation; filling out proposal forms; submitting the proposal; etc.); in the post-award research administration (project managing; financial compliance monitoring; monitoring, reporting; and billing); in editions management; and in science communication activities.

FOSTERING THE SCIENTIFIC DEBATE

During 2022 and 2023, CICS.NOVA hosted the following:

CICS.NOVA ONGOING RESEARCH SEMINAR

11/02/2022	Clayton Rodrigues	As interdições, os mecanismos e dispositivos sociais das relações de poder na formação da pessoa social

- 3º Workshop Técnico Projecto «Estudo reavaliação da capacidade de carga observação de cetáceos no estuário do Sado e zona marinha adjacente»

INCENTIVE TO SCIENTIFIC PRODUCTION – RESEARCH FELLOWS

This incentive aims to support scientific activities of PhD researchers that contribute to CICS.NOVA scientific strategy and applies to proposals for activities to be developed in 2021. This incentive is open to all doctoral researchers, with a maximum value of 500 Euros/Researcher, in the following areas: Publications and Participation in scientific events, including schools or summer and winter courses. The evaluation of the proposals considers the adequacy of the proposal to the specific objectives set out, its articulation with the researcher's CV, its feasibility and its scientific relevance.

CICS.NOVA INITIATIVES

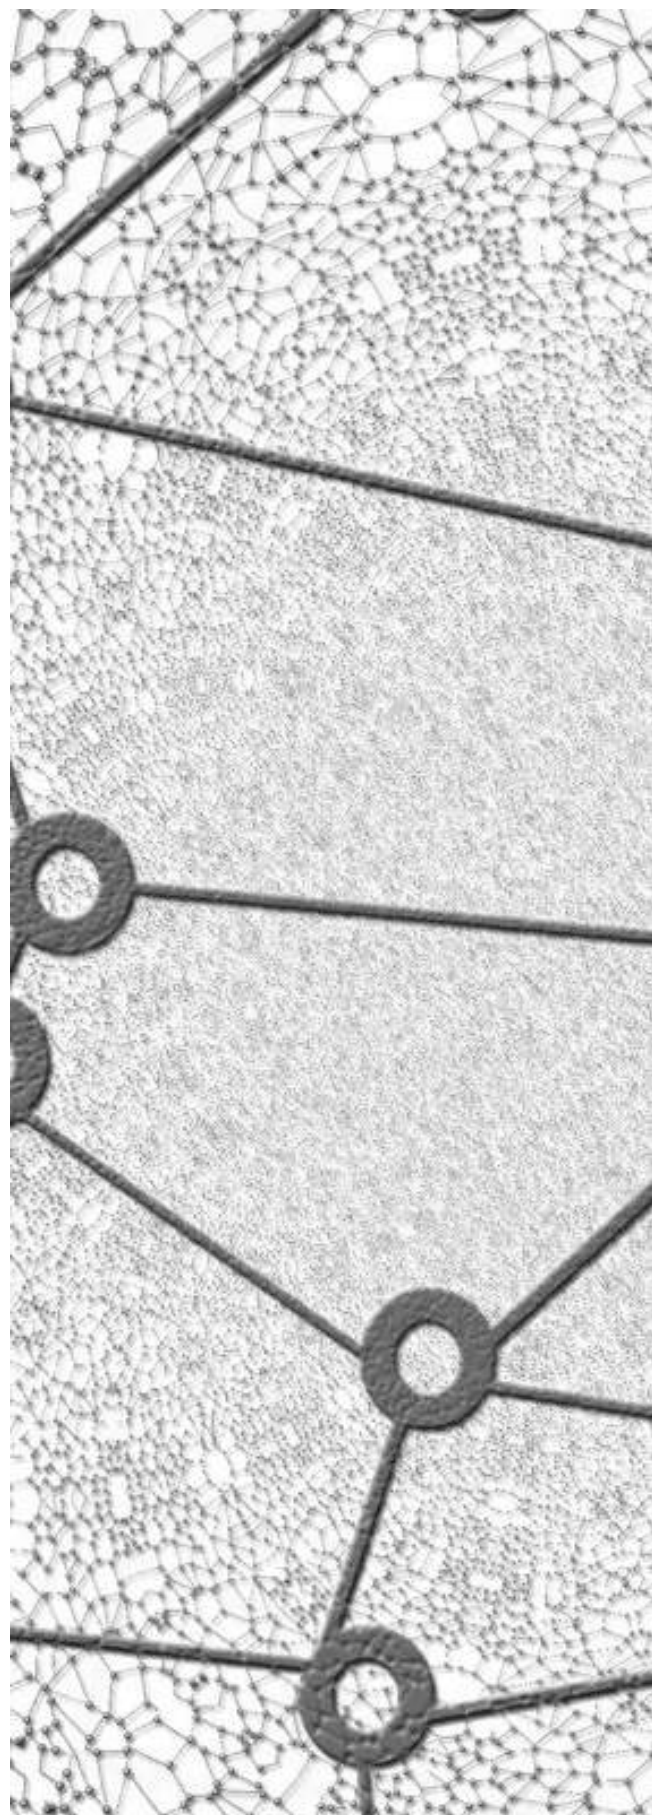

Every year, CICS.NOVA organizes an Open Day for all Master's and Doctoral students associated with our offer. In 2022 the Open Day was simultaneously online and in person and was highly participated. In 2023 the Open Day took place in the outdoor courtyard of Colégio Almada Negreiros at NOVA FCSH and was attended by doctoral students and researchers from all CICS.NOVA Hubs.

SCIENCE IN SOCIETY

2022 and 2023 were years of consolidation and enhancing dissemination for CICS.NOVA on social media. During these years we continue to improve our participation on Facebook, Instagram and YouTube. These channels allowed us to communicate our activities and to share many initiatives with CICS.NOVA's research community and beyond. This was particularly critical in a time of transition between online and in person events.

CICS.NOVA continue to extend its participation in projects of knowledge co-creation involving a diverse set of non-academic stakeholders and in projects supporting policy design and we were involved in a diverse set of scientific outreach activities and major media channels extensively covered our work.

CICS.NOVA reinforced its commitment to Open Science, to make scientific knowledge available, accessible, and reusable to the scientific community and society in general

CICS.NOVA IN THE SOCIAL MEDIA

During 2022 and 2023, CICS.NOVA improved its presence in social media through its webpage and Facebook, Instagram, Twitter, and YouTube accounts.

KNOWLEDGE CO-CREATION AND KNOWLEDGE4POLICY

The joint production of knowledge between our researchers and the industry, governmental and non-governmental organisations has been a pillar of CICS.NOVA's activities from its foundation. Such activities are, many times, articulated with the development of a comprehensive set of tools to inform public policy. In 2022 and 2023, this continued to be the case with all research groups actively participating in multiple knowledge co-creation and knowledge for policy projects in areas as diverse as domestic violence, substance abuse, environment, crime and education, among many others. The following list exemplifies our activities.

SCIENTIFIC OUTREACH

During 2022 and 2023, CICS.NOVA researchers participated in diversified scientific outreach activities that range from online debates, to podcasts and webdocs. The following examples illustrate this work.

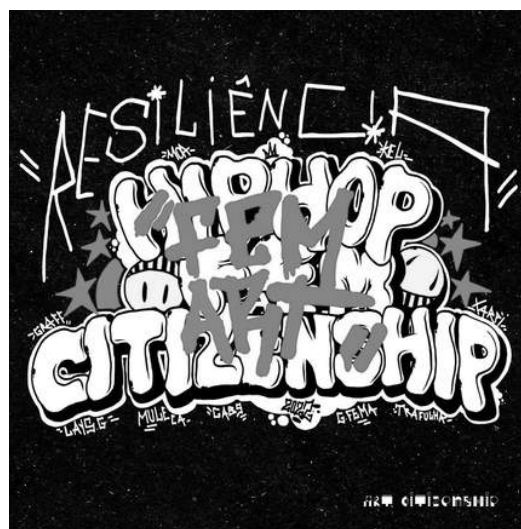

Podcast [In]Pertinente. Between curiosity and knowledge, CICS.NOVA researchers Miguel Chaves and Gonçalo Antunes talk about several societal topics, from work to marital relationships. This podcast is produced and funded by Fundação Francisco Manuel dos Santos.

The graphic features the [In]Pertinente Podcast logo on the left, which includes the stylized letters 'INI' and the text 'PERTINENTE PODCAST'. On the right, it shows the logo for 'FUNDAÇÃO FRANCISCO MANUEL DOS SANTOS' above a black and white photo of hosts Ana Markl and Miguel Chaves wearing headphones. Below the photo, it says 'Disponível em FFMS.PT' with icons for Apple, Spotify, and RSS. At the bottom left, the text reads 'QUE INVENÇÃO É ESTA DO TRABALHO?' and 'SEXTA, 25 FEVEREIRO'.

Residency for female artists from the hip hop scene. Project Artizenship organized a residency for female writers, graffitters, beatmakers and rappers, in collaboration with Associação de Artista Urbanos e de Transformação Social, which resulted in a zine titled RESILIÊNCIA.

“Políticas de habitação em Lisboa: da monarquia à democracia”. Exhibition organized by Lisbon Municipal Archive, in partnership with CICS.NOVA, presenting the urban results of housing policies in the city over the last 200 years, with the scientific curation of researcher Gonçalo Antunes. This initiative also included a film cycle and resulted in a catalogue book.

OPEN SCIENCE AND CICS.NOVA

CICS.NOVA is fully committed to Open Science policies, to make scientific knowledge available, accessible, and reusable to the scientific community and society in general.

The promotion and implementation of Open Access in our researchers' publications, but also in our own editions, is part of that commitment.

MEDIA PRESENCE

The presence of CICS.NOVA's researchers in the media was outstanding during 2021. All major TV channels, newspapers, radio stations and other media channels, covered relevant outputs of our research projects ranging from food waste to domestic violence; from poverty to urban planning; from youth delinquency to in vitro fertilization.

TV CHANNELS: HIGHLIGHTS

Risco de pobreza diminui nos Açores - Interview with Fernando Diogo. RTP3 /RTP Açores. 07/02/2022

“Agricultura Urbana” with the participation of Cecília Delgado. RTP - Biosfera; 26/02/2022.
